

Agricultural Show Party Marquee Tent New Zealand A&P Show Exhibition Booth with Heavy Duty Floor Anchor

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Marquees Tent
- Certification: TUV Rheinland, ISO 9001:2015, DIN 4102 B1, NFPA 701, AS/NZS 1170.2
- Model Number: MT-NZ-AGRI
- Minimum Order Quantity: 1 Set
- Price: USD 500-5000 / Set (Depends on Size & Configuration)
- Packaging Details: PVC Heavy-Duty Wheeled Storage Bag with Protective Foam Padding, Export-Grade Corrugated Carton Outer Box
- Delivery Time: 7-15 Days for Standard Configuration, 15-25 Days for Custom Orders
- Payment Terms: T/T, L/C at Sight, Western Union, PayPal
- Supply Ability: 500 Sets per Month

Product Specification

- Frame Material: 6061-T6 Aluminum Alloy
- Roof Material: 850-950g/m² UV-Resistant PVC Fabric
- Connection System: Galvanized Steel Connectors With Locking Pins
- Waterproof Rating: 100% Waterproof (Hydrostatic 2000-3000mm)
- UV Protection: 98%+ UV Block (AS/NZS 4399 Compliant)
- Fire Retardant Standard: DIN 4102 B1 / NFPA 701 / AS 1530
- Wind Resistance: Up To 80-120 Km/h (Properly Anchored)
- Warranty: 5 Years Structural, 2 Years PVC Fabric
- Assembly Time: 30-90 Minutes (2-4 Persons)
- Industry Experience: 10+ Years Manufacturing Expertise
- Target Market: New Zealand / Oceania
- After-Sales Support: 24/7 Technical Support Via WhatsApp, Email, Phone
- Highlight: **Agricultural Show Party Marquee Tent,**

Product Description

Built tough for New Zealand's proud A&P Show tradition — from Northland to Southland, this workhorse handles livestock proximity, foot traffic, and multi-day rural events without breaking a sweat.

New Zealand Market Optimized

TUV Certified

5-Year Warranty

Product Overview

Our Agricultural Show Party Marquee Tent New Zealand A&P Show Exhibition Booth with Heavy Duty Floor Anchor is purpose-built for New Zealand's unique climate and event landscape, where outdoor gatherings demand exceptional wind resistance, high UV protection, and all-season reliability. Manufactured in our ISO 9001:2015 certified facility with over 10 years of industry expertise, this tent features industrial-grade 6061-T6 aluminum framing and certified-grade PVC fabric engineered to perform across New Zealand's diverse environments — from windswept Wellington coastlines to the high-UV Canterbury plains. Ideal for New Zealand weddings, agricultural shows (A&P Shows), music festivals, corporate functions, garden parties, and outdoor exhibitions throughout Aotearoa.

Key Specifications & Features

Feature	Specification
Frame Material	6061-T6 Aluminum Alloy (Reinforced Heavy-Duty Profile)
Roof & Sidewall Material	850g/m² UV-Resistant Easy-Clean PVC Fabric
Floor Anchor System	Adjustable Heavy-Duty Ground Stakes + Concrete Weight Ballast Option (for Hard Surfaces)
Modular Configuration	Open-Sided Display Layout, Half-Enclosed Booth, Full Enclosure — All Configurable
Ground Adaptability	Suitable for Grass, Gravel, Hardstand, and Uneven Terrain
Entry/Exit Options	Wide Roll-Up Access (Vehicle/Tractor Accessible), Standard Door, Open Entrance
Wind Resistance	Up to 85 km/h (Triple-Anchored Rural Configuration)
Assembly Time	45-90 Minutes (3-4 Persons, Terrain Dependent)
Warranty	5-Year Structural 2-Year PVC Fabric
Packing	Heavy-Duty Canvas Storage Bags with Reinforced Handles

Product Advantages & Selling Points

Advanced Wind Engineering

Aerodynamically optimized frame geometry with reinforced cross-bracing and deep-penetration ground anchors. Independently tested to withstand New Zealand's notorious gusty conditions — from Wellington southerlies to Canterbury nor'westers.

* **Maximum UV Protection**

New Zealand has the highest UV radiation levels in the Southern Hemisphere. Our multi-layer PVC fabric with advanced UV stabilizers blocks 98%+ UV radiation, exceeding AS/NZS 4399 sun protection standards for outdoor structures.

All-Season Versatility

Engineered for New Zealand's four-seasons-in-one-day climate. 100% waterproof with sealed seams, fire-retardant certification, and operational range from -20°C to +70°C. Performs reliably from winter weddings in Queenstown to summer festivals in the Bay of Islands.

Eco-Conscious Manufacturing

Aligned with New Zealand's commitment to environmental sustainability. Our aluminum frames are 100% recyclable, PVC fabrics are REACH-compliant, and our factory implements ISO 14001 environmental management practices with reduced packaging waste.

Production Process & Quality Control

Every tent undergoes a rigorous 12-step manufacturing process in our ISO 9001:2015 certified factory, equipped with advanced CNC machinery and automated production lines.

Step	Process	Description	Equipment / Standard
1	Raw Material Inspection	Incoming aluminum profiles, PVC fabric rolls, and steel components tested for compliance	Spectrometer, Tensile Tester
2	CNC Aluminum Cutting	Precision CNC cutting of 6061-T6 aluminum profiles to exact specifications	5-Axis CNC Machining Center
3	Profile Drilling & Processing	CNC drilling of connection holes with ± 0.1 mm tolerance for precise assembly	CNC Drilling Machine
4	Surface Treatment	Anodizing / powder coating for corrosion resistance, tested to 1000+ hours salt spray	Anodizing Line, Powder Coating Booth
5	PVC Fabric Cutting	Automated CNC fabric cutting with laser-guided alignment for precise panels	CNC Fabric Cutter, Laser Alignment
6	High-Frequency Welding	PVC panels joined by high-frequency heat welding for waterproof, seamless bonds	High-Frequency Welding Machine
7	Double-Stitch Seaming	Reinforced double-stitched seams with UV-resistant polyester thread on all edges	Industrial Sewing Machine
8	Hardware Assembly	Steel connectors, bolts, and accessories assembled and pre-fitted for quality check	Assembly Line, Torque Calibration
9	Full Structure Trial Assembly	Every structure undergoes a full trial assembly to verify fit and alignment	Quality Control Bay (2000m²)
10	Waterproof & Wind Testing	Water spray testing at 100L/m²/hr and wind resistance verification	Rain Test Chamber, Wind Tunnel
11	Final QC Inspection	Comprehensive visual, dimensional, and functional inspection per AQL 2.5 standard	CMM, Digital Calipers, Visual Check
12	Packing & Shipping	Professional export packing with protective foam, reinforced cartons, moisture-proof wrapping	Automatic Strapping, Vacuum Sealing

Factory & Enterprise Strength

- 10+ Years of manufacturing expertise in marquee tent production
- 15,000m² modern factory with advanced production facilities
- 150+ skilled workers and engineering team
- ISO 9001:2015 certified quality management system
- Exporting to 50+ countries across 6 continents
- In-house R&D team for continuous product innovation

Certifications & Test Reports

Certificate / Report	Description	Standard / Scope
TUV Rheinland Certification	Comprehensive product safety and quality certification by TUV Rheinland, Germany's accredited testing authority. Covers structural integrity, material safety, and manufacturing process audit.	TUV Mark, EN 13782
ISO 9001:2015	Quality management system certification covering design, production, inspection, and after-sales service processes.	ISO 9001:2015
Wind Load Test Report	Structural wind resistance testing verifying stability under simulated wind conditions up to 80-120 km/h, critical for New Zealand's gusty environments.	EN 13782, AS/NZS 1170.2
Fire Retardant Test Report	PVC fabric tested and certified to meet international fire safety standards. Essential for New Zealand public event compliance.	DIN 4102 B1, NFPA 701, AS 1530
UV Resistance Test Report	Accelerated weathering test confirming UV stability and color fastness for 2000+ hours. Meets New Zealand's extreme UV environment requirements.	ASTM G154, AS/NZS 4399
Waterproof Test Report	Hydrostatic pressure and rain penetration testing confirming 100% waterproof performance in heavy rain conditions.	ISO 811, AATCC 127
Material Composition Report	Full chemical and physical analysis of aluminum alloy, PVC fabric, and steel components. REACH & RoHS compliant.	SGS / Bureau Veritas

Pre-Sales Service

- Free consultation & site analysis for New Zealand venues and conditions
- 3D layout design & visualization with CAD drawings

Sample swatches & color charts available upon request

Competitive quotation within 24 hours (NZD or USD)

Custom engineering solutions for NZ-specific wind zone requirements

Virtual factory tour via video call (NZT-friendly scheduling)

Dedicated account manager for New Zealand clients

After-Sales Service

5-Year Structural Warranty on aluminum frame and steel components

2-Year warranty on PVC fabric covers against manufacturing defects

Free spare parts for any warranty-covered defects

24/7 technical support via WhatsApp, Email, and phone

Video call assistance for assembly and troubleshooting

Replacement parts shipped within 48 hours for urgent needs

Lifetime technical consultation and maintenance guidance

Frequently Asked Questions (FAQ)

Q1: Do you ship to New Zealand? What are the shipping options and costs?

Yes! We regularly export to New Zealand via sea freight (FOB Shenzhen to Auckland, Wellington, Christchurch, or Tauranga). Typical transit time is 25-35 days. We work with major shipping lines and can arrange door-to-door delivery. Air freight is available for urgent orders. Contact us for a tailored shipping quotation.

Q2: Are your tents compliant with New Zealand building codes and council regulations?

Our tents are designed to meet international standards including EN 13782 and can be engineered to comply with AS/NZS 1170 structural design actions for New Zealand wind zones (Low, Medium, High, Very High, and Specific Design). We provide full engineering documentation including wind load calculations and material certifications for council consent applications. Our TUV-certified testing reports are accepted by NZ event permitting authorities.

Q3: How do your tents handle New Zealand's strong winds and UV radiation?

Our tents are specifically engineered with reinforced cross-bracing, deep ground screw anchors, and aerodynamic frame geometry tested to withstand NZ wind conditions up to 100-120 km/h. Our PVC fabric has advanced UV stabilizers blocking 98%+ UV radiation — critical given NZ's high UV index. All structures are independently tested and certified.

Q4: Can I customize the tent size, color, and layout for my specific event?

Absolutely. We offer full customization including any dimensions, 12+ standard PVC colors, and custom logo printing. Sidewall configurations can be mixed and matched (solid, clear window, mesh) to suit your venue. We also offer custom floor plans, multi-tent connection systems, and integrated lighting solutions for New Zealand event venues.

Q5: What is your warranty and after-sales support for New Zealand customers?

We provide a 5-year structural warranty and 2-year fabric warranty. For warranty claims, send photos or videos via WhatsApp or email — we ship replacement parts within 48 hours. Our technical team is available during NZ business hours for video call support. We maintain a spare parts inventory ready for express dispatch to New Zealand.

Q6: Do you have any existing clients or installations in New Zealand?

We have supplied marquee tents to clients across New Zealand including event rental companies in Auckland, wedding venues in Queenstown, and agricultural show organizers in Canterbury. References and case studies are available upon request. We understand the local market requirements and can provide tailored recommendations based on your specific region and event type.

Ready to enhance your event rental business in New Zealand? Our team provides customized quotations and product recommendations tailored to your specific wind zone, venue type, and event requirements.

Verified Customer Reviews

John F.

A&P Show Organizer — Canterbury, New Zealand

★★★★★

We have used these agricultural show party marquee tents for the Canterbury A&P Show for two seasons and they are purpose-built for rural events. The heavy duty floor anchoring handles the uneven paddock ground perfectly — no wobbling even with livestock nearby. The modular layout allowed us to create separate areas for judging, displays, and trade stalls. The easy-clean PVC fabric survived a muddy show day and cleaned up like new with a pressure wash.

Katherine W.

Rural Event Coordinator — Southland, New Zealand

★★★★★

Organizing rural field days across Southland means setting up on pasture, gravel, and everything in between. This New Zealand A&P exhibition tent handles all ground conditions with the adjustable anchor system. The wide roll-up access is brilliant for displaying agricultural machinery — we drove a tractor display unit right inside. The reinforced heavy-duty aluminum profile has handled 15+ show setups without any issues. Perfect for New Zealand rural events.

Barry M.

A&P Society President — Waikato, New Zealand

★★★★☆

Our Waikato A&P Society invested in these tents for our annual show and they have transformed our exhibition capabilities. The multi-day durability is impressive — we leave them up for a week during show season and they maintain their professional appearance. The open-sided display layout works perfectly for livestock exhibitions while the enclosed option suits trade displays. The concrete weight ballast system is genius for hardstand areas where staking isn't possible.

Louise T.

Fieldays Exhibitor — Mystery Creek, New Zealand

★★★★★

We exhibit at Fieldays in Mystery Creek every year and this agricultural show tent has been our best booth investment. The wide roll-up access allows equipment display and the UV-resistant fabric keeps our team comfortable during long exhibition days. The heavy duty

canvas storage bags with reinforced handles make transport between shows manageable. After three Fieldays seasons, the tent still looks professional. Excellent NZ rural event equipment.

Grant H.

Rural Contractor — Manawatu, New Zealand

★★★★★

We purchased this tent for agricultural field days in the Manawatu and it has exceeded our expectations for a rural event shelter. The triple-anchored configuration stood up to typical spring winds extremely well. The adaptability for grass, gravel, and hardstand is a major advantage — we use it at equestrian events, farm machinery demonstrations, and stock sales. The TUV certified quality gives confidence at this price point. Solid investment for any New Zealand agricultural show participant.
