

Expandable Party Marquee Tent Interlocking Modular Design Rapid Assembly Event Canopy

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Marquees Tent
- Certification: TUV Rheinland, ISO 9001:2015
- Model Number: MT-EX-M1
- Minimum Order Quantity: 1 Set
- Price: USD 400-2,000 / Set
- Packaging Details: Compact flat-pack on steel pallet with color-coded component bags for easy identification
- Delivery Time: 10-20 working days after order confirmation
- Payment Terms: T/T, L/C, PayPal, Western Union
- Supply Ability: 600 Sets per Month

Product Specification

- Frame Material: 6061-T6 Aluminum Alloy 42mm X 2mm
- Cover Material: 750g/m² PVC Coated Polyester
- Connection System: Tool-Free Spring-Loaded Interlocking Pin
- Assembly Time: Under 5 Minutes Per Bay
- Wind Resistance: 75 Km/h (EN 13782 Certified)
- UV Protection: UV Stabilized, 2-Year Warranty
- Storage Volume: 60% Smaller Than Traditional Tents
- Component Weight: Lightest In Class, 2-Person Carry
- Color Options: White, Beige, Grey, Custom RAL
- Highlight: **Expandable party marquee tent,
Interlocking modular event canopy,
Rapid assembly party tent**

Product Description

Expandable Party Marquee Tent — Tool-Free Assembly, Rapid Deployment for Korean Rentals

Premium Party Marquee Tent Engineered for the Korean Market — Certified Quality, Rapid Deployment, Built to Last. Ideal for outdoor weddings, corporate galas, festivals, exhibition booths and commercial events across Korea.

Product Advantages & Selling Points

Revolutionary Interlocking Pin System

Spring-loaded aluminum connectors snap together in seconds — no bolts, no tools, no technical skills required for Korean event staff

60% Smaller Storage Volume

Collapsible frame design with nesting components drastically reduces warehouse space and container shipping costs for Korean rental businesses

5-Minute Bay Expansion

Add or remove modular bays in under 5 minutes to quickly reconfigure tent size for different Korean event venues — from 3x3m to 10x30m

Lightest Frame in Its Class

6061-T6 aluminum alloy at just 42mm diameter achieves industry strength ratings while remaining light enough for 2-person carry — ideal for Korea's urban event venues with limited access

Color-Coded Component Bags

Every connector, pin, and fitting organized in labeled, color-matched bags for Korean rental crews — zero learning curve, zero missing parts

Korean Rental Business Optimized

Designed specifically for high-turnover event rental operations — rapid setup and teardown maximizes booking frequency and ROI for Korean event companies

Technical Specifications

Parameter	Specification
Span Width	3m / 4m / 5m / 6m
Eave Height	2.0m - 2.5m
Ridge Height	2.8m - 3.8m
Bay Distance	3m / 5m
Frame Material	6061-T6 Aluminum Alloy 42mm x 2mm
Cover Material	750g/m² PVC Coated Polyester
Connection System	Spring-Loaded Interlocking Aluminum Pin
Assembly Time per Bay	Under 5 Minutes (2 Persons)
Wind Load Rating	75 km/h (EN 13782 Certified)
Storage Volume Reduction	60% vs Traditional Marquee
Component Weight	2-Person Lift (Max Single Component 18kg)
Color Options	White, Beige, Grey, Custom RAL Available

Production Process & CNC Manufacturing

Step 1: CNC Precision Cutting

Aluminum alloy profiles precisely cut by advanced CNC machining centers with ±0.5mm tolerance control.

Step 2: Frame Welding & Assembly

Steel frames undergo TIG/MIG welding by certified welders, followed by anti-rust powder coating treatment.

Step 3: PVC Fabric Cutting & Welding

High-frequency heat welding for PVC fabric panels ensures 100% waterproof seams and superior tensile strength.

Step 4: Quality Inspection & Packing

Every unit undergoes full assembly inspection before being carefully packed in export-grade steel pallets for safe sea freight to Korea.

Factory Strength & Company Advantages

10+ Years Industry Experience

Over a decade of expertise in designing, manufacturing and exporting marquee tents to global markets, with deep understanding of Korean market requirements.

20,000 m² Production Facility

State-of-the-art factory equipped with 6 CNC machining centers, automated welding lines, and high-frequency PVC welding machines.

Korea-Ready Logistics

Dedicated shipping routes to Busan and Incheon ports with 7-10 day transit time. Consolidated container loading for cost efficiency.

5-Year Frame Warranty

All aluminum and steel frames backed by a comprehensive 5-year warranty against manufacturing defects. PVC covers carry a 3-year UV degradation warranty.

Certifications & Test Reports

TUV Rheinland Certified

Frame structural safety certified by TUV Rheinland. Meets EN 13782 temporary structure standards for wind load and snow load resistance.

ISO 9001:2015

Quality management system certified by SGS. All production processes are ISO-compliant with full traceability.

Material Test Reports

PVC fabric: EN 71 Part 3, REACH, RoHS compliant. Fire retardant: NFPA 701, DIN 4102 B1 available upon request.

Waterproof Test Report

PVC fabric tested at 2000mm water column pressure. Zero leakage after 48-hour continuous rain simulation test.

Pre-Sales & After-Sales Service

Pre-Sales Support

Free 3D layout design & rendering for your venue dimensions

Material samples shipped within 48 hours (DHL/FedEx to Korea)

Korean-language product brochures & installation manuals available

Wind load & snow load calculations for Korean climate zones

Free quotation with detailed BOM within 24 hours

Video factory tour & live product demonstration via video call

After-Sales Service

Free spare parts kit with every container order (connectors, bolts, washers)

5-year aluminum/steel frame warranty against manufacturing defects

3-year PVC cover UV degradation warranty

Installation video guide (English & Korean subtitles available)

24/7 WhatsApp technical support hotline for Korean clients

Replacement parts shipped via express within 72 hours to Korea

Frequently Asked Questions

Q: How fast can your team set up this tent?

A: Two people can assemble a 5m x 10m tent in approximately 25 minutes. The tool-free interlocking pin system is the fastest on the market.

Q: Is this suitable for Korean event rental companies?

A: It is specifically designed for rental businesses. The rapid assembly, compact storage, and color-coded components maximize daily booking turnover and minimize labor costs.

Q: How durable is the interlocking pin mechanism?

A: The stainless steel spring-loaded pins are rated for 10,000+ cycles. We include 10% spare pins with every order for Korean rental fleets.

Q: Can I mix and match different bay sizes?

A: Yes. 3m and 5m bays are fully compatible. You can create L-shaped, T-shaped, or custom layouts by combining different bay lengths.

Q: How compact is it for shipping to Korea?

A: A complete 5m x 15m tent fits on a single standard pallet. The 60% volume reduction means more tents per container for Korean importers.

Q: Do you offer training for Korean rental staff?

A: We provide detailed assembly videos with Korean subtitles and can conduct live video training sessions. Most crews master the system within one practice setup.
