

PVC Heavy Duty Party Tent Foldable Portable Gazebo Reinforced Sidewalls for Belarus Winter Festival

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Marquees Tent
- Certification: TUV, CE, ISO 9001:2015, B1/M2
- Model Number: MT-HDP2024
- Minimum Order Quantity: 1 Set
- Price: USD 30-75 / Square Meter
- Packaging Details: Heavy-duty steel pallet with export-grade PVC film, frame components packed in foam-lined reinforced cartons
- Delivery Time: 7-15 working days after deposit
- Payment Terms: T/T, L/C, Western Union, PayPal
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Frame Material: High-Strength Galvanized Steel Q235
- Fabric Material: 900g/m² PVC Coated Polyester (Fire Retardant)
- Wind Load Rating: 100-120 Km/h (Beaufort 11)
- Snow Load Capacity: Up To 0.75 KN/m²
- Temperature Range: -35°C To +70°C
- Flame Retardant Standard: B1 / M2 / NFPA 701
- Foldable Design: Scissor-Style Quick Fold Mechanism
- Sidewall Thickness: 0.65mm Double-Layer PVC
- Warranty: 5 Years On Frame And Fabric
- Assembly Time: 2 Persons / 30 Minutes (Standard Size)
- Highlight: **PVC heavy duty party tent , foldable portable gazebo with reinforced sidewalls , winter festival marquee tent**

Product Description

Product Overview

The **Marquees Tent MT-HDP2024** is a heavy-duty PVC party tent engineered for Belarusian winter festivals, Christmas markets, and cold-season outdoor events. Featuring 900g/m² fire-retardant PVC fabric and a high-strength galvanized steel frame, this tent withstands temperatures as low as -35°C with a snow load capacity of 0.75 kN/m². The innovative scissor-style foldable design enables rapid deployment and compact storage, making it the ideal choice for seasonal event operators across Belarus and Eastern Europe.

Key Specifications

Parameter	Specification
Frame Material	High-Strength Galvanized Steel Q235
Fabric Material	900g/m² PVC Coated Polyester (Fire Retardant)
Wind Load Rating	100-120 km/h (Beaufort 11)
Snow Load Capacity	Up to 0.75 kN/m²
Temperature Range	-35°C to +70°C
Flame Retardant Standard	B1 / M2 / NFPA 701
Foldable Design	Scissor-Style Quick Fold Mechanism
Sidewall Thickness	0.65mm Double-Layer PVC
Assembly Time	2 Persons / 30 Minutes (Standard Size)
Warranty	5 Years on Frame and Fabric

Product Advantages & Selling Points

Extreme Cold Performance

Tested and proven at -35°C in simulated Belarus winter conditions, PVC fabric maintains flexibility without cracking or delamination.

Scissor Fold Mechanism

Patented quick-fold design reduces setup and teardown time by 60% compared to traditional frame tents, ideal for frequent relocation.

Triple Fire Safety Rating

B1, M2, and NFPA 701 certified fire-retardant fabric ensures full compliance with Belarusian and EU event safety regulations.

Heavy Snow Load Capacity

Reinforced galvanized steel frame rated for 0.75 kN/m² snow load, exceeding typical Belarus winter requirements.

Double-Layer Sidewalls

0.65mm thick double-layer PVC sidewalls with heat-sealed seams provide superior insulation and wind protection.

Compact Transport

Folded size reduced by 70% compared to rigid frame tents, enabling cost-efficient container shipping to Belarus.

Production Process

1

Steel Inspection

Q235 galvanized steel tested for tensile strength and coating thickness

2

CNC Tube Cutting

Precision CNC laser cutting with $\pm 0.3\text{mm}$ tolerance

3

Welding & Joint Assembly

Robot-assisted MIG welding for consistent joint strength

4

Anti-Corrosion Coating

Hot-dip galvanization and electrostatic powder coating

5

PVC Fabric HF Welding

High-frequency welding for waterproof seam integrity

6

Fold Mechanism Assembly

Scissor hinge installation and friction testing

7

Full Structure Trial

Complete assembly inspection with load simulation testing

8

Export Packaging

Steel pallet with anti-moisture vacuum sealing

Factory & Enterprise Strength

Our 15,000 m² manufacturing facility houses **8 CNC machining centers**, automated steel tube processing lines, high-frequency PVC welding stations, and an in-house structural testing laboratory. With **200+ skilled workers** and an annual output of 600,000 m², we are one of China's leading marquee tent exporters. Our factory holds **TUV Rheinland certification**, ISO 9001:2015 quality management, and has served clients in **30+ countries** including regular exports to Belarus, Russia, Ukraine, and the Baltic states.

TUV Certification & Test Reports

Verified Quality Documentation

Complete certification package available including: TUV Structural Integrity Report (Wind Load 120 km/h) | CE Declaration of Conformity | ISO 9001:2015 Quality Certificate | B1/M2/NFPA 701 Fire Retardant Test Reports | Q235 Steel Tensile Strength Certificate | PVC Fabric Cold Crack Test (-35°C) | Snow Load Simulation Report (0.75 kN/m²)

Pre-Sales Service

Site Assessment

Free evaluation of your Belarus event site including ground conditions, wind exposure, and space planning recommendations.

Custom Configuration

Tailored tent size, sidewall configuration, and accessory selection based on your specific event requirements.

Material Samples

PVC fabric swatches, steel profile samples, and color charts shipped to Belarus for hands-on evaluation.

Logistics Planning

Complete shipping cost estimation, customs documentation preparation, and delivery timeline projection for Belarus.

After-Sales Service

Assembly Training

Bilingual (English/Russian) assembly manuals, step-by-step video guides, and live video call setup support.

On-Site Deployment

Professional installation crew available for dispatch to Belarus for large-scale event tent deployments.

Spare Parts Express

Dedicated spare parts inventory with DHL/FedEx express shipping to Minsk within 5-7 business days.

5-Year Full Warranty

Comprehensive warranty covering frame structure, PVC fabric, and folding mechanism components.
