

Insulated Roof Aluminum Frame Party Marquee Tent Thermal Lining for Hot Summer Outdoor Celebrations

Our Product Introduction

Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: Tendars
- Certification: TUV, CE, ISO 9001:2015, SGS
- Model Number: TDR-INS-PT
- Minimum Order Quantity: 50 Square Meters
- Price: USD 20-50 / Square Meter
- Packaging Details: Aluminum frame wrapped in bubble film and woven bags; PVC roof and side walls packed in canvas bags; hardware packed in export cartons
- Delivery Time: 15-25 days after deposit confirmation
- Payment Terms: T/T, L/C, PayPal, Western Union
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Product Name: Insulated Roof Aluminum Frame Party Marquee Tent
- Frame Material: Aluminum Alloy 6061/T6
- Roof System: Double Layer: PVC Cover + Thermal Lining With Air Gap
- Temperature Reduction: Up To 8 C Cooler Than Single-layer Tents
- Cover Fabric: 750 / 850 G/sqm Double PVC-coated Polyester
- Waterproof Rating: Above 3000 Mm H2O
- Wind Resistance: Up To 80 Km/h
- Fire Rating: DIN 4102 B1 / M2 (cover And Lining)
- Usage: Summer Weddings, Hot Climate Events, Daytime Parties
- Warranty: 5 Years On Frame, 3 Years On Fabric
- Highlight: **Insulated roof party marquee tent, Aluminum frame marquee tent, Thermal lining outdoor party tent**

Product Description

Product Overview

The Tendars Insulated Roof Aluminum Frame Party Marquee Tent is built for Bulgarian summer heat. A thermal lining layer under the PVC roof reflects solar radiation and creates an air gap that keeps the interior up to 8 C cooler - essential for July and August weddings when outdoor temperatures pass 35 C. Guests stay comfortable, and catering and decoration stay fresh.

Designed for the Bulgaria Market

Bulgarian weddings (svatba) are grand celebrations with 200-500 guests, held in garden marquees from May to September - our aluminum frame tents create a comfortable, elegant ballroom for the full celebration

Baptisms (krashtene), milestone birthdays and summer corporate parties drive steady demand for quick-install marquee tents across the country

Bulgarian summers are hot and dry (35+ C); UV-resistant and optional insulated roofing keeps interiors cool and pleasant

The Balkan foothills mean many event gardens sit on sloped or uneven ground - adjustable-leg frame designs level the tent perfectly

On the Black Sea coast (Varna, Burgas, Sunny Beach), summer storms and salty air demand storm anchoring and rust-proof aluminum frames

As an EU member state, Bulgaria requires CE-certified products; we provide full CE documentation with every order

We ship regularly to Bulgaria via Varna and Burgas seaports with complete export and customs paperwork

Key Advantages & Selling Points

Thermal lining reduces interior temperature by up to 8 C in summer heat

Aluminum alloy 6061/T6 frame with strong support for the double-layer roof

UV-resistant outer PVC fabric blocks harsh midday sun

Better acoustics: lining reduces rain noise on the roof

Elegant finished ceiling look for wedding photography

Optional cooling fans and misting systems for extreme heat

5-year frame warranty with lining fabric in multiple colors

Why Aluminum Alloy Frame (vs Steel Frame)

Comparison	Tendars Aluminum Alloy 6061/T6	Traditional Steel Frame
Weight	About 1/3 of steel - lighter, easier to transport and assemble	Heavy - needs more labor and bigger trucks
Corrosion	Anodized aluminum: naturally rust-proof, ideal for humid/coastal areas	Steel must be galvanized or painted, still rusts over time
Strength-to-weight	Excellent - 6061/T6 alloy is aerospace grade	Strong but heavy
Service Life	15+ years with normal use	8-10 years before rust maintenance is needed
Maintenance	Minimal - wipe and store	Regular anti-rust treatment required
Resale Value	High - aluminum scrap and frame retain value	Low

Technical Specifications

Parameter	Specification
Product Name	Insulated Roof Aluminum Frame Party Marquee Tent
Frame Material	Aluminum alloy 6061/T6
Roof System	Double layer: PVC cover + thermal lining with air gap
Temperature Reduction	Up to 8 C cooler than single-layer tents
Cover Fabric	750 / 850 g/sqm double PVC-coated polyester
Waterproof Rating	Above 3000 mm H2O

Wind Resistance	Up to 80 km/h
Fire Rating	DIN 4102 B1 / M2 (cover and lining)
Usage	Summer weddings, hot climate events, daytime parties
Warranty	5 years on frame, 3 years on fabric

Bulgaria Event Season Calendar

Season	Event Demand	Recommended Configuration
March - April	Early-season communions and corporate events; enclosed tents recommended for cool weather	4 Season enclosure, full PVC walls
May - June	Peak wedding season begins; garden receptions and baptisms	Clear span, interior lining, LED lighting
July - August	Hottest months; Black Sea coast weddings and festivals	Insulated roof, UV fabric, storm anchoring
September - October	Golden autumn weddings; harvest festivals	Full enclosure for cool evenings, lighting
November - February	Off-season; tents stored or used for winter storage	Winter storage guidance and maintenance

Production Process (CNC Precision Manufacturing)

- Design & engineering: CAD structural design and wind-load calculation by our R&D team
- CNC precision cutting: aluminum alloy 6061/T6 profiles cut, drilled and milled by CNC machines for exact tolerance
- Surface treatment: anodizing or powder coating for anti-corrosion protection
- Frame assembly: bolted connections with stainless steel hardware
- Fabric processing: PVC-coated polyester fabric cut and joined by automatic HF high-frequency welding machines
- Reinforcement: double-stitched hems, Keder rails and anti-tear straps
- Quality inspection: 100% inspection of frame, fabric, zippers and hardware
- Packing: bubble film + woven bags for frames, canvas bags for covers, cartons for hardware

Factory & Enterprise Strength

Located in Guangzhou, Guangdong, China, our factory covers 20,000+ square meters with 200+ skilled workers and 10+ years of dedicated experience in aluminum marquee tent manufacturing. We operate advanced CNC cutting machines, automatic HF welding lines, anodizing lines and full assembly workshops, reaching a monthly supply capacity of 50,000 square meters. Our aluminum frame tents are exported to 60+ countries including Bulgaria, Romania, Poland, Germany and the USA.

Item	Detail
Factory Area	20,000+ square meters
Workforce	200+ skilled workers
Industry Experience	10+ years
Monthly Supply Capacity	50,000 square meters
Export Markets	60+ countries including Bulgaria
Main Equipment	CNC cutting machines, automatic HF welding lines, anodizing lines

Certifications & Test Reports

Certificate / Test	Coverage
TUV	Product safety and structural load verified by TUV-type testing
CE	Conformity with European safety and quality directives - essential for the EU market
ISO 9001:2015	Certified quality management system for production control
SGS	Third-party inspection reports available for fabric and frame
Flame Retardant Test	Roof and side wall fabric tested to DIN 4102 B1 / M2 standards

Waterproof Test	Fabric water pressure resistance above 3000 mm H2O
UV Resistance Test	Fabric UV stability tested for outdoor exposure
Wind Load Test	Full structure wind load tested up to 80-100 km/h
Salt Spray Test	Anodized frame surface tested for corrosion resistance (coastal use)

Installation & Site Preparation Checklist

- Site survey: measure the ground, check slope, obstacles and access for transport
- Ground preparation: clear debris, level major bumps, mark anchor points
- Frame layout: lay out color-coded frame parts according to the assembly drawing
- Frame erection: connect sections, then raise and lock all joints (2-6 workers depending on size)
- Cover installation: pull the PVC cover over the frame and secure Keder rails
- Anchoring: install ground stakes, ballast or concrete anchors - never skip in windy seasons
- Final check: tension the cover, close all zippers, test lighting and stability

Maintenance & Storage Guide

- Clean the PVC fabric with mild soap and water; avoid abrasive tools and solvents
- Inspect frame joints and bolts before each event; re-tighten if needed
- Close all zippers and vents during storage to prevent moisture buildup
- Store the tent in a dry, ventilated space; aluminum frames do not rust but keep them off wet floors
- Replace worn ropes, straps or stakes promptly - spare parts are available from our factory
- For winter storage, fold fabric without sharp creases and stack frames on pallets

Pre-Sale & After-Sale Service

Pre-Sale Service

- Free consultation on tent type, layout and budget planning for your event
- 3D design drawings and event layout proposals within 48 hours
- OEM / ODM service: custom size, color, roof printing and logo branding
- Pre-production samples available before mass production
- Clear quotation with full specification sheet and delivery schedule

After-Sale Service

- Step-by-step installation guide, video tutorial and on-site remote guidance
- Free spare parts for any quality issue within the warranty period
- 24-hour response time for all after-sales inquiries
- Lifetime technical support from our engineering team
- Door-to-door logistics to Bulgaria via Varna or Burgas seaport, with full CE and EU customs documentation

Ordering & Decision Guide

- Tell us your event type, guest count and preferred layout - we recommend the right tent model and size
- Receive a 3D layout drawing and detailed quotation within 48 hours
- Confirm the design, fabric color and options (walls, lining, lighting, flooring)
- We produce and inspect your tent, then share photos and test reports before shipping
- Door-to-door delivery to Bulgaria with installation guidance and full support

Frequently Asked Questions

Q: How long does delivery to Bulgaria take?

A: Production takes 15-25 days after deposit confirmation, then sea freight to Varna or Burgas port. We provide full tracking and customs documents.

Q: Can the tent stay installed for the whole wedding season?

A: Yes. The aluminum frame is designed for long-term installation. We recommend checking anchors and cover tension every 4-6 weeks.

Q: Do you provide installation support?

A: Every order includes an illustrated manual and video guide. For large tents, we also offer remote step-by-step guidance from our engineers.

Q: What is covered by the 5-year warranty?

A: The aluminum frame structure is warranted for 5 years and the PVC fabric for 3 years against manufacturing defects under normal use.

Q: Can I get a custom size for my garden?

A: Yes, we offer free engineering design for bespoke sizes and layouts - send us your garden dimensions and we will draw the perfect tent.

5-Year Warranty

Every Tendars aluminum party marquee tent is covered by a **5-year warranty** on the aluminum frame and **3-year warranty** on the PVC fabric under normal use. Any structural or material defect is repaired or replaced free of charge, giving you total peace of mind for years of events.

E-E-A-T: Why Trust Tendars

Pillar	What It Means For You
Experience	10+ years in aluminum marquee tent manufacturing, 5,000+ projects delivered worldwide
Expertise	In-house R&D engineers, CNC precision production and certified welding team
Authoritativeness	TUV, CE, ISO 9001:2015 and SGS certified factory with third-party test reports
Trust	5-year warranty, transparent pricing, real factory visits welcome and verified export record
