

Waterproof UV Protected Aluminum Party Tent Double PVC Coated Roof for Summer Festivals

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Tendars
- Certification: ISO 9001:2015, CE, SGS
- Model Number: TND-PMT-UV04
- Minimum Order Quantity: 25 Square Meters
- Price: USD 35-85 / Square Meter
- Packaging Details: Aluminum frame wrapped in bubble film; PVC roof and sidewalls packed in PVC fabric carry bags; hardware packed in carton boxes
- Delivery Time: 15-25 days after deposit confirmation; samples in 7 days
- Payment Terms: T/T, L/C, Western Union, , PayPal
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Frame Material: Hard Pressed Extruded Aluminum Alloy 6061/T6
- Cover Material: 650g/750g/850g Per Sqm Double PVC-Coated Polyester Fabric
- Side Walls: Removable PVC Walls With Clear PVC Window Options
- Fire Rating: M2 / B1 Flame-Retardant Fabric Available
- Assembly: Tool-Free Quick-Connect Frame Joints
- Waterproof Rating: High-Frequency Welded Seams, Fully Waterproof
- UV Protection: UV50+ Coating Protects Guests And Furnishings
- Heat Reflection: White PVC Roof Reflects Sunlight To Keep Interiors Cooler
- Ventilation: Optional Ridge Ventilation And Wall Windows
- Usage: Summer Festivals, Outdoor Weddings, Garden Parties

Product Description

Product Overview - Waterproof UV Protected Aluminum Party Tent

Croatian summers are glorious - long sunny days, warm evenings and festivals everywhere from Pula to Hvar. But the same season brings intense UV radiation and sudden thunderstorms. The Tendars waterproof UV protected aluminum party tent is made for exactly this weather: a **double PVC-coated roof** that keeps heavy rain out and a **UV50+ protective coating** that shields guests and equipment from the sun.

Whether you are setting up a festival lounge, a wedding reception under the open sky or a garden party that must survive an afternoon shower, this tent combines proven waterproof construction with sun-smart materials. The white reflective roof keeps the interior noticeably cooler, and optional ventilation and window configurations turn the tent into a comfortable room rather than just a cover.

Key Selling Points

- **Fully waterproof construction** - double PVC-coated polyester with high-frequency welded seams; no stitching holes, no leaks.
- **UV50+ protection** - the coated fabric blocks harmful UV rays and protects guests, furniture and catering equipment.
- **Cooler interior** - the white reflective roof reduces heat build-up, keeping guests comfortable in the summer sun.
- **Durable fabric grades** - choose 650g, 750g or 850g per sqm fabric depending on your climate and usage intensity.
- **Fire-retardant options** - M2 / B1 rated fabric for venues and municipalities with strict fire safety requirements.
- **Ventilation options** - ridge ventilation and wall windows create airflow and prevent stuffiness on hot days.
- **Aluminum frame** - rust-free 6061/T6 alloy, quick to assemble and easy to move between festival locations.
- **All-season value** - equally useful for rainy spring events and sunny summer festivals.

Technical Specifications

Parameter	Description
Frame Material	Hard Pressed Extruded Aluminum Alloy 6061/T6
Cover Material	650g / 750g / 850g per sqm Double PVC-Coated Polyester Fabric
Waterproof Rating	High-Frequency Welded Seams, Fully Waterproof
UV Protection	UV50+ Coating Protects Guests and Furnishings
Heat Reflection	White PVC Roof Reflects Sunlight to Keep Interiors Cooler
Ventilation	Optional Ridge Ventilation and Wall Windows
Fire Rating	M2 / B1 Flame-Retardant Fabric Available
Usage	Summer Festivals, Outdoor Weddings, Garden Parties
Certification	ISO 9001:2015, CE, SGS
Assembly	Tool-Free Quick-Connect Frame Joints

Made for the Croatian Summer Season

- **Festival ready** - from open-air stages to food courts and VIP lounges, the tent stands up to a full season of setups and takedowns.
- **Wedding season** - Croatian wedding season runs from May to September; a waterproof, elegant tent keeps the celebration going through any weather.
- **Sun-smart design** - with UV50+ fabric and reflective roofing, guests stay comfortable even at midday events.
- **Storm resistant** - welded waterproof seams and tensioned panels handle sudden summer downpours without leaking.
- **Easy logistics between venues** - the lightweight aluminum frame and compact packing make it practical for agencies serving multiple locations on the coast.

Fabric Grades - Choose What Fits Your Needs

Fabric Grade	Typical Use	Characteristics
650g per sqm	Seasonal events, private parties	Lightweight, easy handling, fully waterproof
750g per sqm	Frequent use, rental fleets	Balanced durability and weight
850g per sqm	Long-term installation, harsh weather	Maximum strength and tear resistance

About Tendars - Your Trusted Aluminum Marquee Tent Manufacturer

Tendars is a professional aluminum marquee tent manufacturer based in Guangdong, China, with **more than 10 years of experience** in the design, engineering and production of frame tents for parties, weddings, events, storage and sports use. From our first workshop to today's waterproof tent fabric workshop, we have grown into a full-process manufacturer with an in-house R&D team, modern production lines and a dedicated export department serving buyers across Europe and the world.

Every Tendars marquee tent is built around one principle: **a strong aluminum frame plus a proven PVC cover equals a structure your guests can trust**. Our engineering team works with hard-pressed extruded aluminum alloy 6061/T6, the same alloy family widely used in demanding structural applications, and pairs it with double PVC-coated polyester fabric from qualified suppliers. The result is a tent range that performs season after season.

- **10+ years of manufacturing experience** in aluminum frame tents and event structures.
- **20,000+ sqm production base** with extrusion, cutting, welding, sewing and assembly workshops.
- **In-house engineering and design team** supporting OEM and ODM projects from drawing to delivery.
- **ISO 9001:2015 quality management system**, with CE and SGS verified production.
- **Exported to 40+ countries**, including EU markets such as Croatia, Germany, Austria, Slovenia, Italy and Hungary.
- **Stable supply capacity** of 50,000 square meters of tents per month for seasonal peak orders.
- **Dedicated export sales team** with fast response, installation guidance and after-sales support.

Quality Control - Every Batch Is Checked

Quality is not a slogan at Tendars; it is a documented process. Our QC team follows a three-stage inspection routine so that the tents you receive match the samples you approved.

- 2. Incoming inspection** - aluminum profiles are checked for alloy grade, hardness and surface treatment; PVC fabric rolls are tested for weight, tensile strength and coating adhesion.
- 3. In-process inspection** - frame welding, drilling, assembly tolerance and sewing quality are monitored on the production line.
- 4. Final inspection** - every batch is assembled and checked against an AQL 2.5 sampling plan; waterproof, UV and flame-retardant performance are verified with the material certificates.

Before shipment, we send you **inspection photos and videos** of your actual goods, including packaging status, so there are no surprises at the port.

Packaging, Delivery and Payment

- **Packaging:** aluminum frame profiles are wrapped in bubble film; PVC roof and sidewalls are folded into PVC fabric carry bags; bolts, nuts and hardware are packed in carton boxes.
- **Delivery time:** 15-25 days after deposit confirmation; samples can be ready within 7 days.
- **Shipping:** we arrange sea, rail and air freight worldwide. For Croatia we regularly ship to the ports of Rijeka, Split and Ploče, and can quote FOB, CIF, DDU or DDP terms.
- **Payment:** T/T, L/C, Western Union, and PayPal are accepted.
- **Supply ability:** 50,000 square meters per month, so seasonal orders for the summer event market are never a problem.

Frequently Asked Questions

Is the tent completely waterproof?

Yes. The roof and walls use double PVC-coated polyester with high-frequency welded seams, so there are no needle holes and no leaking points.

Does the fabric really block UV rays?

The cover is coated with a UV50+ protective layer, which blocks the large majority of harmful UV radiation and slows fabric aging.

Which fabric weight should we choose?

For a rental fleet used every weekend we recommend 750g or 850g per sqm; for occasional private events 650g per sqm is a cost-effective choice.

Can the tent be used in winter too?

Yes - with walls closed and optional heating, the tent works for autumn and winter events as well.

Do you offer flame-retardant fabric?

Yes, M2 / B1 flame-retardant fabric is available, which is often required for public events and venues.
