

Quick Install Modular Aluminum Party Marquee Tent Expandable System for Event Rental Companies

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Tendars
- Certification: ISO 9001:2015, CE, SGS
- Model Number: TND-PMT-MOD05
- Minimum Order Quantity: 25 Square Meters
- Price: USD 35-85 / Square Meter
- Packaging Details: Aluminum frame wrapped in bubble film; PVC roof and sidewalls packed in PVC fabric carry bags; hardware packed in carton boxes
- Delivery Time: 15-25 days after deposit confirmation; samples in 7 days
- Payment Terms: T/T, L/C, Western Union, , PayPal
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Frame Material: Hard Pressed Extruded Aluminum Alloy 6061/T6
- Cover Material: 650g/750g/850g Per Sqm Double PVC-Coated Polyester Fabric
- Side Walls: Removable PVC Walls With Clear PVC Window Options
- Fire Rating: M2 / B1 Flame-Retardant Fabric Available
- Assembly: Quick-Connect Joints, Tool-Free Assembly
- Modular Design: Expandable Bay-by-Bay System
- Packing: Compact Packing For Van Transport And Storage
- Flexibility: Add Or Remove Bays, Change Layout Freely
- Usage: Event Rental Fleets, Temporary Venues, Pop-Up Events
- Accessories: Transport Bags, Storage Covers, Spare Parts Kits
- Highlight: **modular aluminum party tent,**

Product Description

Product Overview - Quick Install Modular Aluminum Party Marquee Tent

For event rental companies, time is money - and so is storage space. The Tendars quick install modular aluminum party marquee tent is built around the reality of the rental business: **fast setup**, **compact transport**, **flexible layouts** and the ability to grow the tent as the order grows. The modular bay system lets you expand the marquee by adding bays, so one product line covers everything from an intimate birthday tent to a large festival hall.

The tent assembles without special tools thanks to quick-connect frame joints. A small crew can erect the structure in a fraction of the time needed for conventional systems, which means more jobs per weekend and lower labor cost per event. When the event is over, the tent packs into compact bundles that fit into a van - and back into your warehouse with minimal space.

Key Selling Points

- **Expandable bay system** - add bays to extend the tent; the same components build small and large venues.
- **Tool-free quick install** - quick-connect joints allow fast assembly and takedown by a small crew.
- **Compact packing** - profiles and fabric pack into bundles sized for van transport and efficient storage.
- **One fleet, many layouts** - combine bays, walls, windows and doors to match each client's event.
- **Durable for daily use** - anodized 6061/T6 aluminum frame and abrasion-resistant PVC fabric survive constant handling.
- **Spare parts support** - spare joint kits, tensioners and fabric repair materials available for quick local maintenance.
- **Low labor cost per event** - shorter setup time means your crew serves more clients per season.
- **Brand-ready** - optional logo printing turns your fleet into a marketing tool at every event.

Technical Specifications

Parameter	Description
Frame Material	Hard Pressed Extruded Aluminum Alloy 6061/T6, Anodized
Cover Material	650g / 750g / 850g per sqm Double PVC-Coated Polyester Fabric
Modular Design	Expandable Bay-by-Bay System
Assembly	Quick-Connect Joints, Tool-Free Assembly
Packing	Compact Packing for Van Transport and Storage
Flexibility	Add or Remove Bays, Change Layout Freely
Usage	Event Rental Fleets, Temporary Venues, Pop-Up Events
Accessories	Transport Bags, Storage Covers, Spare Parts Kits
Certification	ISO 9001:2015, CE, SGS
Sample Time	Prototype within 7 Days

The Rental Business Advantage in Croatia

- **More bookings per weekend** - fast install and takedown let your team handle multiple events in one weekend, especially during the busy season.
- **Serve the whole country** - compact packing means one van can move the tent between Zagreb, the coast and the islands.
- **Scale with demand** - start with a small modular set and expand bays as your client base grows; no need to buy a second tent system.
- **Lower storage cost** - compact bundles reduce warehouse space compared to bulky one-piece structures.
- **Fewer damaged parts** - the anodized frame and protected joints are designed for repeated assembly and disassembly.
- **Rental-friendly accessories** - flooring, lighting and furniture packages let you upsell a complete event solution.

How Modular Expansion Works

2. **Start with a base module** - a complete marquee with roof, walls and frame.

3. **Add bays** - each additional bay extends the length of the tent using identical frame connections.
4. **Configure walls** - choose full walls, half walls, clear windows or open sides for each bay.
5. **Adapt to the venue** - the modular layout follows the shape of the space, from narrow terraces to wide fields.

About Tendars - Your Trusted Aluminum Marquee Tent Manufacturer

Tendars is a professional aluminum marquee tent manufacturer based in Guangdong, China, with **more than 10 years of experience** in the design, engineering and production of frame tents for parties, weddings, events, storage and sports use. From our first workshop to today's modular tent production line, we have grown into a full-process manufacturer with an in-house R&D team, modern production lines and a dedicated export department serving buyers across Europe and the world.

Every Tendars marquee tent is built around one principle: **a strong aluminum frame plus a proven PVC cover equals a structure your guests can trust**. Our engineering team works with hard-pressed extruded aluminum alloy 6061/T6, the same alloy family widely used in demanding structural applications, and pairs it with double PVC-coated polyester fabric from qualified suppliers. The result is a tent range that performs season after season.

- **10+ years of manufacturing experience** in aluminum frame tents and event structures.
- **20,000+ sqm production base** with extrusion, cutting, welding, sewing and assembly workshops.
- **In-house engineering and design team** supporting OEM and ODM projects from drawing to delivery.
- **ISO 9001:2015 quality management system**, with CE and SGS verified production.
- **Exported to 40+ countries**, including EU markets such as Croatia, Germany, Austria, Slovenia, Italy and Hungary.
- **Stable supply capacity** of 50,000 square meters of tents per month for seasonal peak orders.
- **Dedicated export sales team** with fast response, installation guidance and after-sales support.

Quality Control - Every Batch Is Checked

Quality is not a slogan at Tendars; it is a documented process. Our QC team follows a three-stage inspection routine so that the tents you receive match the samples you approved.

2. **Incoming inspection** - aluminum profiles are checked for alloy grade, hardness and surface treatment; PVC fabric rolls are tested for weight, tensile strength and coating adhesion.
3. **In-process inspection** - frame welding, drilling, assembly tolerance and sewing quality are monitored on the production line.
4. **Final inspection** - every batch is assembled and checked against an AQL 2.5 sampling plan; waterproof, UV and flame-retardant performance are verified with the material certificates.

Before shipment, we send you **inspection photos and videos** of your actual goods, including packaging status, so there are no surprises at the port.

Packaging, Delivery and Payment

- **Packaging:** aluminum frame profiles are wrapped in bubble film; PVC roof and sidewalls are folded into PVC fabric carry bags; bolts, nuts and hardware are packed in carton boxes.
- **Delivery time:** 15-25 days after deposit confirmation; samples can be ready within 7 days.
- **Shipping:** we arrange sea, rail and air freight worldwide. For Croatia we regularly ship to the ports of Rijeka, Split and Ploče, and can quote FOB, CIF, DDU or DDP terms.
- **Payment:** T/T, L/C, Western Union, and PayPal are accepted.
- **Supply ability:** 50,000 square meters per month, so seasonal orders for the summer event market are never a problem.

Frequently Asked Questions

How fast can the tent be installed?

A standard modular marquee can be erected by a small crew in a few hours, depending on size and configuration. No special tools are needed.

How does the modular expansion work?

The tent is built from identical bays. You add bays to extend the length, and each bay can be configured with different walls and windows.

Is the system suitable for daily rental use?

Yes. The anodized aluminum frame and durable PVC fabric are selected for repeated assembly, transport and storage.

Do you provide spare parts?

Yes, we supply spare joint kits, tensioners, fabric panels and repair materials so you can maintain the fleet locally.

Can we print our rental company logo on the tents?

Certainly. Logo printing on roof and walls is a popular option for rental fleets and turns every event into brand exposure.
