

Winter Insulated Aluminum Party Tent All Season Use Heating Ready Design for Hungary

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Tendars
- Certification: ISO 9001:2015, CE, SGS
- Model Number: TND-PMT-WI07
- Minimum Order Quantity: 25 Square Meters
- Price: USD 35-85 / Square Meter
- Packaging Details: Aluminum frame wrapped in bubble film; PVC roof and sidewalls packed in PVC fabric carry bags; hardware packed in carton boxes
- Delivery Time: 15-25 days after deposit confirmation; samples in 7 days
- Payment Terms: T/T, L/C, Western Union, , PayPal
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Features: Waterproof, Windproof, Thermal Comfort Options
- Frame Material: Hard Pressed Extruded Aluminum Alloy 6061/T6
- Cover Material: 650g/750g/850g Per Sqm Double PVC-Coated Polyester Fabric
- Side Walls: Removable PVC Walls With Clear PVC Window Options
- Fire Rating: M2 / B1 Flame-Retardant Fabric Available
- Assembly: Tool-Free Quick-Connect Frame Joints
- Insulation: Optional Thermal Liner For Cold Season Events
- Heating Ready: Prepared For Heater Units And Warm Air Systems
- Snow Consideration: Reinforced Roof Design For Winter Loads
- Usage: Winter Weddings, Corporate Events, Christmas Events, All-Season Parties

Product Description

Product Overview - Winter Insulated Aluminum Party Tent

Hungarian winters are beautiful - and cold. With temperatures often dropping below freezing and snow arriving as early as November, outdoor events need more than a simple canopy. The Tendars winter insulated aluminum party tent is an **all-season venue solution**: a strong aluminum frame, a fully enclosed waterproof cover and a **heating-ready design** that turns a frozen garden or terrace into a warm, inviting event space.

This tent is designed for the full Hungarian calendar - winter weddings, Christmas and New Year celebrations, corporate events, thermal spa gatherings and early-spring festivals. Optional thermal liners trap heat inside, while the frame is prepared for heater units and warm-air systems. When summer returns, the same tent opens up with removable walls and becomes a breezy garden marquee.

Key Selling Points

- **All-season versatility** - one tent serves winter and summer events; walls open or close in minutes.
- **Heating-ready design** - frame and cover prepared for heater placement and warm-air circulation.
- **Optional thermal liner** - an inner insulating layer that keeps warmth in and cuts heating costs.
- **Cold-climate engineering** - reinforced roof design and durable fabric rated for winter conditions.
- **Fully enclosed option** - complete wall sets with doors keep wind, snow and cold out.
- **Waterproof and windproof** - double PVC-coated fabric with welded seams handles rain, sleet and snow.
- **Rust-free aluminum frame** - 6061/T6 alloy stays strong through freeze-thaw cycles.
- **Easy seasonal storage** - compact packing for warehouse storage between seasons.

Technical Specifications

Parameter	Description
Frame Material	Hard Pressed Extruded Aluminum Alloy 6061/T6
Cover Material	650g / 750g / 850g per sqm Double PVC-Coated Polyester Fabric
Insulation	Optional Thermal Liner for Cold Season Events
Heating Ready	Prepared for Heater Units and Warm Air Systems
Snow Consideration	Reinforced Roof Design for Winter Loads
Side Walls	Removable Full Wall Sets with Door Options
Fire Rating	M2 / B1 Flame-Retardant Fabric Available
Usage	Winter Weddings, Corporate Events, Christmas Events, All-Season Parties
Certification	ISO 9001:2015, CE, SGS
Assembly	Tool-Free Quick-Connect Frame Joints

Made for the Hungarian Climate

- **Freezing winters** - with walls closed and a heater running, the tent stays comfortable even below zero, extending your event season all year round.
- **Budapest winter events** - from Advent markets to New Year parties, an insulated tent venue stands out in the city's event scene.
- **Thermal spa culture** - Hungary's famous thermal baths host events all year; an insulated marquee suits spa-side gatherings even in cold months.
- **Snow and sleet** - the reinforced roof and sealed cover handle winter precipitation without leaking.
- **Warm summers too** - remove the walls and the same tent becomes a light, airy summer venue - true all-season value.

Winter Event Checklist

2. **Close all walls** - install the full wall set with doors for complete enclosure.
3. **Add the thermal liner** - reduce heat loss and improve comfort.

4. **Set up heating** - position heater units according to our layout guidance.
5. **Secure the structure** - use ground anchors or ballast for wind and snow loads.

About Tendars - Your Trusted Aluminum Marquee Tent Manufacturer

Tendars is a professional aluminum marquee tent manufacturer based in Guangdong, China, with **more than 10 years of experience** in the design, engineering and production of frame tents for parties, weddings, events, storage and sports use. From our first workshop to today's all-season tent production line, we have grown into a full-process manufacturer with an in-house R&D team, modern production lines and a dedicated export department serving buyers across Europe and the world.

Every Tendars marquee tent is built around one principle: **a strong aluminum frame plus a proven PVC cover equals a structure your guests can trust**. Our engineering team works with hard-pressed extruded aluminum alloy 6061/T6, the same alloy family widely used in demanding structural applications, and pairs it with double PVC-coated polyester fabric from qualified suppliers. The result is a tent range that performs season after season.

- **10+ years of manufacturing experience** in aluminum frame tents and event structures.
- **20,000+ sqm production base** with extrusion, cutting, welding, sewing and assembly workshops.
- **In-house engineering and design team** supporting OEM and ODM projects from drawing to delivery.
- **ISO 9001:2015 quality management system**, with CE and SGS verified production.
- **Exported to 40+ countries**, including EU markets such as Hungary, Austria, Germany, Romania, Slovakia and Poland.
- **Stable supply capacity** of 50,000 square meters of tents per month for seasonal peak orders.
- **Dedicated export sales team** with fast response, installation guidance and after-sales support.

Quality Control - Every Batch Is Checked

Quality is not a slogan at Tendars; it is a documented process. Our QC team follows a three-stage inspection routine so that the tents you receive match the samples you approved.

2. **Incoming inspection** - aluminum profiles are checked for alloy grade, hardness and surface treatment; PVC fabric rolls are tested for weight, tensile strength and coating adhesion.
3. **In-process inspection** - frame welding, drilling, assembly tolerance and sewing quality are monitored on the production line.
4. **Final inspection** - every batch is assembled and checked against an AQL 2.5 sampling plan; waterproof, UV and flame-retardant performance are verified with the material certificates.

Before shipment, we send you **inspection photos and videos** of your actual goods, including packaging status, so there are no surprises at the border.

Packaging, Delivery and Payment

- **Packaging:** aluminum frame profiles are wrapped in bubble film; PVC roof and sidewalls are folded into PVC fabric carry bags; bolts, nuts and hardware are packed in carton boxes.
- **Delivery time:** 15-25 days after deposit confirmation; samples can be ready within 7 days.
- **Shipping:** we arrange sea, rail and air freight worldwide. For Hungary we regularly ship via the ports of Koper, Rijeka and Hamburg with overland delivery to Budapest, and can quote FOB, CIF, DDU or DDP terms.
- **Payment:** T/T, L/C, Western Union, and PayPal are accepted.
- **Supply ability:** 50,000 square meters per month, so seasonal orders for the summer event market are never a problem.

Frequently Asked Questions

Can this tent really be used in Hungarian winter?

Yes. With the full wall set, optional thermal liner and a heater, the tent provides a comfortable space even in freezing temperatures.

Is heating equipment included?

Heaters are not included, but the tent is designed to work with standard heater units and warm-air systems, and we provide layout guidance.

Does the roof handle snow?

The reinforced roof design is prepared for winter loads; we recommend removing heavy snow accumulation and using proper anchoring.

Can we use the tent in summer too?

Absolutely - the walls are removable, so the same tent becomes an open, breezy summer marquee.

Do you deliver to Hungary?

Yes, we ship via European ports with overland delivery to Budapest and other Hungarian cities, on FOB, CIF, DDU or DDP terms.
