

Storm Resistant Aluminum Party Marquee Tent Heavy Duty Frame for Hungarian Summer Events

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Tendars
- Certification: ISO 9001:2015, CE, SGS
- Model Number: TND-PMT-SR09
- Minimum Order Quantity: 25 Square Meters
- Price: USD 35-85 / Square Meter
- Packaging Details: Aluminum frame wrapped in bubble film; PVC roof and sidewalls packed in PVC fabric carry bags; hardware packed in carton boxes
- Delivery Time: 15-25 days after deposit confirmation; samples in 7 days
- Payment Terms: T/T, L/C, Western Union, , PayPal
- Supply Ability: 50000 Square Meters per Month

Product Specification

- Frame Material: Hard Pressed Extruded Aluminum Alloy 6061/T6
- Cover Material: 650g/750g/850g Per Sqm Double PVC-Coated Polyester Fabric
- Side Walls: Removable PVC Walls With Clear PVC Window Options
- Fire Rating: M2 / B1 Flame-Retardant Fabric Available
- Assembly: Tool-Free Quick-Connect Frame Joints
- Wind Resistance: Reinforced Frame For Summer Storm And Gust Conditions
- Reinforcement: Extra Cross Bracing And Heavy Duty Frame Nodes
- Anchoring: Heavy-Duty Ground Anchors And Ballast Options
- Usage: Summer Events, Festivals, Open-Air Celebrations
- Safety Factor: Frame Design With High Safety Margin

Product Description

Product Overview - Storm Resistant Aluminum Party Marquee Tent

Hungarian summers are warm - and famously stormy. Rapidly developing thunderstorms bring strong gusts, heavy rain and sometimes hail, often in the middle of an outdoor celebration. The Tendars storm resistant aluminum party marquee tent is engineered for these conditions. Its **heavy duty 6061/T6 aluminum frame** is reinforced with extra cross bracing and heavy duty nodes, while a complete anchoring system keeps the structure planted when the wind picks up.

Storm resistance is a system, not a single part: stiffer frame geometry, high-strength connection plates, tensioned fabric panels and professional anchoring work together. For event organizers who cannot cancel - weddings, company celebrations, festival stages - this tent provides the structural confidence that keeps guests safe and events on schedule.

Key Selling Points

- **Reinforced frame structure** - extra cross bracing and heavy duty nodes distribute wind loads across the whole tent.
- **High safety margin** - frame calculations include generous safety factors for gusty summer conditions.
- **Professional anchoring** - heavy-duty ground anchors and ballast options for every ground type.
- **Wind-tensioned cover** - the PVC roof is cut and tensioned to reduce flapping and noise in strong wind.
- **Rapid storm response** - removable walls come down in minutes to reduce wind load when a storm approaches.
- **Waterproof in downpours** - welded seams keep heavy rain out, even during violent summer showers.
- **Rust-free aluminum** - anodized profiles stay strong and clean season after season.
- **Complete documentation** - structural drawings and anchoring guidance provided with every order.

Technical Specifications

Parameter	Description
Frame Material	Hard Pressed Extruded Aluminum Alloy 6061/T6, Anodized
Cover Material	650g / 750g / 850g per sqm Double PVC-Coated Polyester Fabric
Wind Resistance	Reinforced Frame for Summer Storm and Gust Conditions
Reinforcement	Extra Cross Bracing and Heavy Duty Frame Nodes
Anchoring	Heavy-Duty Ground Anchors and Ballast Options
Safety Factor	Frame Design with High Safety Margin
Side Walls	Removable PVC Walls with Quick-Release Fittings
Fire Rating	M2 / B1 Flame-Retardant Fabric Available
Usage	Summer Events, Festivals, Open-Air Celebrations
Certification	ISO 9001:2015, CE, SGS

Built for Hungarian Summer Storms

- **Thunderstorm season** - Hungarian summers bring sudden convective storms; this tent is designed to keep standing when the sky turns dark.
- **Gust protection** - the reinforced bracing layout handles the strong, short gusts typical of summer storm fronts.
- **Event continuity** - with proper anchoring, the celebration continues under cover while the storm passes.
- **Peace of mind for planners** - organizers across Hungary can promise a weather-proof venue with confidence.
- **Versatile anchoring** - anchor sets for grass, gravel, concrete and asphalt cover every venue surface.

Anchoring and Safety Guidance

- Every order includes anchoring recommendations based on tent size and local wind conditions.
- We provide an installation and safety checklist in English and Hungarian for your crew.

- Spare anchors, tensioners and frame connections are available for fast local maintenance.

About Tendars - Your Trusted Aluminum Marquee Tent Manufacturer

Tendars is a professional aluminum marquee tent manufacturer based in Guangdong, China, with **more than 10 years of experience** in the design, engineering and production of frame tents for parties, weddings, events, storage and sports use. From our first workshop to today's heavy duty storm tent production line, we have grown into a full-process manufacturer with an in-house R&D team, modern production lines and a dedicated export department serving buyers across Europe and the world.

Every Tendars marquee tent is built around one principle: **a strong aluminum frame plus a proven PVC cover equals a structure your guests can trust**. Our engineering team works with hard-pressed extruded aluminum alloy 6061/T6, the same alloy family widely used in demanding structural applications, and pairs it with double PVC-coated polyester fabric from qualified suppliers. The result is a tent range that performs season after season.

- **10+ years of manufacturing experience** in aluminum frame tents and event structures.
- **20,000+ sqm production base** with extrusion, cutting, welding, sewing and assembly workshops.
- **In-house engineering and design team** supporting OEM and ODM projects from drawing to delivery.
- **ISO 9001:2015 quality management system**, with CE and SGS verified production.
- **Exported to 40+ countries**, including EU markets such as Hungary, Austria, Germany, Romania, Slovakia and Poland.
- **Stable supply capacity** of 50,000 square meters of tents per month for seasonal peak orders.
- **Dedicated export sales team** with fast response, installation guidance and after-sales support.

Quality Control - Every Batch Is Checked

Quality is not a slogan at Tendars; it is a documented process. Our QC team follows a three-stage inspection routine so that the tents you receive match the samples you approved.

- 2. Incoming inspection** - aluminum profiles are checked for alloy grade, hardness and surface treatment; PVC fabric rolls are tested for weight, tensile strength and coating adhesion.
- 3. In-process inspection** - frame welding, drilling, assembly tolerance and sewing quality are monitored on the production line.
- 4. Final inspection** - every batch is assembled and checked against an AQL 2.5 sampling plan; waterproof, UV and flame-retardant performance are verified with the material certificates.

Before shipment, we send you **inspection photos and videos** of your actual goods, including packaging status, so there are no surprises at the border.

Packaging, Delivery and Payment

- **Packaging:** aluminum frame profiles are wrapped in bubble film; PVC roof and sidewalls are folded into PVC fabric carry bags; bolts, nuts and hardware are packed in carton boxes.
- **Delivery time:** 15-25 days after deposit confirmation; samples can be ready within 7 days.
- **Shipping:** we arrange sea, rail and air freight worldwide. For Hungary we regularly ship via the ports of Koper, Rijeka and Hamburg with overland delivery to Budapest, and can quote FOB, CIF, DDU or DDP terms.
- **Payment:** T/T, L/C, Western Union, and PayPal are accepted.
- **Supply ability:** 50,000 square meters per month, so seasonal orders for the summer event market are never a problem.

Frequently Asked Questions

How strong a storm can this tent handle?

With proper anchoring, the reinforced frame is engineered for strong summer gusts. The exact rating depends on size, anchoring and site exposure - our engineers will advise the right configuration.

What anchoring options are available?

We offer ground anchors for grass and soil, and ballast systems for concrete and asphalt. Tell us your venue surface and we will recommend the right set.

Can walls be removed quickly when a storm comes?

Yes - the walls use quick-release fittings so wind load can be reduced in minutes.

Is the frame rust-proof?

Yes, the 6061/T6 aluminum frame is anodized and does not rust, even after repeated exposure to rain and humidity.

Do you provide installation guidance?

Yes - drawings, a step-by-step manual and video guidance are included, plus WhatsApp support during your first installation.
