

Aluminum Alloy Party Marquee Tent Nigeria Outdoor Event Wedding Ceremony Venue

Our Product Introduction

Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: Marquees Tent
- Certification: ISO 9001:2015, CE, SGS
- Model Number: AMT-NG-100
- Minimum Order Quantity: 1 Set
- Price: USD 680-3,800 / Set
- Packaging Details: Waterproof woven bag + wooden pallet, seaworthy export packing for sea freight to Lagos, Nigeria
- Delivery Time: 7-15 days for standard sizes, 15-30 days for custom orders
- Payment Terms: T/T, L/C, Western Union, PayPal
- Supply Ability: 500 Sets per Month

Product Specification

- Frame Material: Aluminum Alloy 6061-T6, Anodized Finish
- Cover Material: 850g Double-Sided PVC Tarpaulin, Flame Retardant
- Roof Type: Peak Roof (Double Layer Optional)
- Available Widths: 3m / 5m / 8m / 10m / 15m / 20m / 25m / 30m
- Available Lengths: Custom, In 3m Or 5m Bay Modules
- Wall Options: Solid PVC Walls, Clear PVC Windows, Half Walls, French Doors
- Waterproof Rating: 100% Waterproof, Heat-Sealed Seams
- Wind Load: 80-100 Km/h With Standard Anchoring
- UV Protection: UPF 50+ Coated Cover
- Assembly Time: 4-6 Workers, 2-4 Hours For A 10m X 20m Tent
- Frame Lifespan: 10-15 Years With Normal Maintenance
- Fire Rating: DIN 4102 B1 / M2 Flame Retardant
- Highlight: aluminum alloy party marquee tent,

Product Description

Aluminum Alloy Party Marquee Tent - The Complete Event Venue Solution for Nigeria

From Lagos owambe weddings to Abuja corporate galas, from church conventions to naming ceremonies, the **aluminum alloy party marquee tent** has become the backbone of Nigerian outdoor events. Our free-span aluminum frame design removes all center poles, giving you one uninterrupted open space that can hold banquet tables, dance floors, stages and hundreds of guests - the way Nigerian celebrations deserve.

Unlike steel pipe tents that rust in the humidity and sag under weight, our marquee uses **6061-T6 aluminum alloy profiles** that are light enough for quick handling yet strong enough for permanent-style installations. The 850g double-sided PVC roof is 100% waterproof, UV-stabilized and flame retardant, keeping your guests comfortable through Nigeria's intense sun and sudden evening downpours.

Every tent is manufactured to order, which means your venue is never "one size fits all" - we engineer the exact span, length, wall configuration and colors your event demands, then ship it to your door with full assembly support.

Key Features

Free-Span Aluminum Frame: No center poles, no obstructed views - maximum usable floor space for catering, stages and guest seating.

Lightweight Yet Strong: Aluminum alloy profiles are 60% lighter than steel, easier to transport across Nigeria and faster to erect, while still rated for 80-100 km/h winds.

100% Waterproof PVC Roof: Heat-sealed seams and a steep self-draining roof pitch mean zero leakage during heavy rain.

Total Sun Protection: UPF 50+ coated cover blocks harmful UV rays - essential under Nigeria's year-round tropical sun.

Tool-Free Assembly: Numbered frames and quick-release pins allow 4-6 workers to erect a 10m x 20m venue in 2-4 hours.

Fully Modular & Expandable: Add bays to lengthen your tent, or connect multiple tents for L-shape, T-shape and courtyard layouts.

Complete Accessory Compatibility: Lining ceilings, chandeliers, flooring, air conditioning points, stages and side walls all integrate with the frame system.

Corrosion-Resistant: Anodized aluminum finish never rusts, so white tents stay white even after years of tropical use.

Built for the Nigerian Market

Did you know? Nigeria's event calendar peaks between November and March - the dry season wedding rush - while church crusades, trade fairs and corporate events run all year. A single well-built marquee tent in Lagos can be booked 40+ weekends per year.

Owambe-Ready Capacity: Our free-span design accommodates the large guest lists typical of Nigerian weddings and burial ceremonies - 300 to 2,000+ guests without a single obstructing pole.

Harmattan Wind Tested: The peak roof geometry and engineered anchoring handle the dry, dusty harmattan winds of December-February.

Rainy Season Proof: Heat-sealed 850g PVC and self-draining roof angles keep events running even in May-October downpours.

Sea Freight to Nigerian Ports: Compact packing means a 10m x 20m tent ships economically to Apapa, Tin Can Island or Onne in standard containers.

Proven Local Supply: We regularly supply tent hire companies in Lagos, Abuja, Port Harcourt, Ibadan and Kano, and understand the documentation and packaging needed for smooth Nigerian customs clearance.

Technical Specifications

Specification	Detail
---------------	--------

Specification	Detail
Frame Material	Aluminum Alloy 6061-T6, Anodized Finish
Cover Material	850g Double-Sided PVC Tarpaulin, Flame Retardant
Roof Type	Peak Roof (Double Layer Optional)
Available Widths	3m / 5m / 8m / 10m / 15m / 20m / 25m / 30m
Available Lengths	Custom, in 3m or 5m Bay Modules
Wall Options	Solid PVC Walls, Clear PVC Windows, Half Walls, French Doors
Waterproof Rating	100% Waterproof, Heat-Sealed Seams
Wind Load	80-100 km/h with Standard Anchoring
UV Protection	UPF 50+ Coated Cover
Assembly Time	4-6 Workers, 2-4 Hours for a 10m x 20m Tent
Frame Lifespan	10-15 Years with Normal Maintenance
Fire Rating	DIN 4102 B1 / M2 Flame Retardant

Applications

- Wedding receptions and traditional marriage ceremonies
- Naming ceremonies and child dedications
- Church conventions, crusades and harvest programs
- Corporate events, product launches and end-of-year parties
- Burial ceremonies and funeral receptions
- Community gatherings, political rallies and town hall meetings
- Exhibitions, trade fairs and market events
- School events, alumni gatherings and award nights

Why Buy Direct From Our Factory

- 10+ Years of Specialized Experience:** Our factory has designed and manufactured aluminum alloy marquee tents since 2013, delivering 5,000+ structures to clients across Africa, the Middle East, Europe and Southeast Asia.
- Certified Production & Quality Control:** ISO 9001:2015 certified workshop. Every frame batch is weld-tested and every PVC cover is water-tested before packing, so what arrives in Nigeria is ready to erect.
- Aluminum Alloy Engineering Expertise:** We build with 6061-T6 and 6082-T6 aluminum profiles - the same alloy family trusted in aerospace structures - anodized or powder-coated to resist corrosion in tropical climates.
- Proven Nigeria Export Record:** Regular sea freight shipments to Apapa and Tin Can Island ports, Lagos, with complete export documentation, fumigation certificates and seaworthy packing.
- In-House Design & Structural Calculation:** Every configuration is checked with CAD structural analysis - wind load, span, anchoring - before production begins. No guessing, no cutting corners.
- Responsive After-Sales Support:** Spare parts supply, assembly drawings, video guidance and 24-hour replies to technical questions from our export team.

Frequently Asked Questions

- Q: What sizes are available?** A: Standard widths from 3m to 30m and any length in 3m/5m modules. If your space needs a non-standard size, our engineers will customize the frame layout for you.
- Q: How long does shipping to Nigeria take?** A: Sea freight from Guangzhou to Lagos typically takes 25-35 days. We handle all

export documentation and provide the packing list and fumigation certificate needed for clearance.

Q: Can the tent be used in the rainy season? A: Yes. The roof is 100% waterproof with heat-sealed seams, and the steep pitch prevents water from pooling. Many Nigerian clients use these tents year-round.

Q: Do you provide installation support? A: Every order includes a numbered assembly drawing and video guide. For large orders we can also arrange remote video guidance during your first installation.

Q: What is your warranty? A: 12 months against manufacturing defects on frame and cover, plus lifetime technical support and spare parts supply.

Q: Can I print my company logo on the tent? A: Yes - full-color digital printing on roof and walls is available. Send your artwork and we will provide a free proof.

Simple 4-Step Ordering Process

- 1 Inquiry:** Send us your required size, quantity and event type via Email or WhatsApp.
- 2 Proposal:** Within 24 hours you receive a CAD layout, structural specification, quotation and freight estimate.
- 3 Production:** 7-15 days for standard sizes, 15-30 days for custom printing or special configurations, with production photos before shipment.
- 4 Delivery:** Seaworthy packing, full shipping documents, and remote assembly guidance until your tent is standing.
