

Waterproof Aluminum Party Marquee Tent Nigeria Rain Season Outdoor Event Shelter

Our Product Introduction

Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: Marquees Tent
- Certification: ISO 9001:2015, CE, SGS
- Model Number: AMT-NG-200
- Minimum Order Quantity: 1 Set
- Price: USD 750-4,200 / Set
- Packaging Details: Waterproof woven bag + wooden pallet, seaworthy export packing for sea freight to Lagos, Nigeria
- Delivery Time: 7-15 days for standard sizes, 15-30 days for custom orders
- Payment Terms: T/T, L/C, Western Union, PayPal
- Supply Ability: 500 Sets per Month

Product Specification

- Cover Material: 900g Double-Sided PVC Tarpaulin
- Waterproof Rating: 100% Waterproof, Heat-Sealed & Taped Seams
- Roof Design: Self-Draining Gable / Peak Roof, 15-20 Degree Slope
- Rain Management: Integrated Gutter System With Downpipe Points
- Frame Material: Aluminum Alloy 6061-T6, Rust-Proof Anodized Finish
- Mold Resistance: Anti-Mildew & Anti-Fungal PVC Treatment
- Available Widths: 5m / 8m / 10m / 15m / 20m / 25m
- UV Protection: UPF 50+
- Wind Load: 80-100 Km/h
- Fire Rating: DIN 4102 B1 / M2
- Assembly Time: 4-6 Workers, 2-4 Hours For A 10m X 20m Tent
- Frame Lifespan: 10-15 Years With Normal Maintenance

Product Description

Waterproof Aluminum Party Marquee Tent - Rain Season Event Shelter for Nigeria

Between May and October, Nigeria's rainy season brings heavy downpours that can flood an unprepared event venue in minutes. Event planners and tent hire companies across Lagos, Port Harcourt and Abuja trust our **waterproof aluminum party marquee tent** because it is engineered specifically for tropical rainfall - not adapted to it.

The heart of the system is a **900g double-sided PVC tarpaulin** - 50% heavier than standard marquee covers - with every seam heat-sealed and taped. Rain runs off the steep 15-20 degree roof pitch into an integrated gutter system, keeping the entrance dry and the ground firm even during a full evening storm.

Because the frame is rust-proof anodized aluminum, there are no steel columns to corrode and streak red stains down your white tent. Your venue stays crisp, clean and photogenic from the first event to the hundredth.

Key Features

900g Heavy-Duty PVC Cover: Commercial-grade tarpaulin with double-sided lamination resists tearing, puncturing and constant folding.

Heat-Sealed & Taped Seams: No needle holes, no capillary leaks - the weakest point of ordinary tents is eliminated entirely.

Self-Draining Roof Geometry: A 15-20 degree slope means water never pools, even in the heaviest tropical downpour.

Integrated Gutter System: Channels rainwater to controlled downpipe points instead of dumping it at the entrance.

Anti-Mildew Treatment: The PVC formulation includes fungicides that prevent black mold spots in humid conditions.

Rust-Proof Aluminum Frame: Anodized 6061-T6 alloy stays corrosion-free, protecting both the structure and your reputation.

Quick Dry-Out: The smooth PVC surface dries fast after rain, so back-to-back weekend bookings are never delayed.

Compatible With Solid Walls: Add full PVC walls with clear windows to create a completely enclosed, weather-proof hall.

Why Rain-Ready Tents Matter in Nigeria

Market insight: Nigeria's rainy season (May-October) is no longer a "dead season" for events - churches hold rainy-season conventions, companies launch products, and weddings continue year-round. A rain-proof marquee fleet is what separates busy hire companies from idle ones.

Year-Round Revenue for Hire Businesses: With a waterproof marquee you can accept bookings 12 months a year, including the June-September peak rain months when competitors turn customers away.

Protects Your Investment: Water trapped on a flat roof collapses tents and destroys covers. Our self-draining design and gutter system protect a structure that should serve you 10-15 years.

Guest Comfort & Safety: No dripping water over buffet tables, no muddy entrances, no electrical hazards - the details that keep your clients coming back.

Built for Lagos & Port Harcourt Humidity: Coastal humidity and salt air corrode steel frames within months; anodized aluminum shrugs it off for years.

Fast Clearance-Friendly Packing: All covers and frames are packed on pallets with full documentation, simplifying import through Nigerian ports.

Technical Specifications

Specification	Detail
Cover Material	900g Double-Sided PVC Tarpaulin
Waterproof Rating	100% Waterproof, Heat-Sealed & Taped Seams
Roof Design	Self-Draining Gable / Peak Roof, 15-20 Degree Slope

Specification	Detail
Rain Management	Integrated Gutter System with Downpipe Points
Frame Material	Aluminum Alloy 6061-T6, Rust-Proof Anodized Finish
Mold Resistance	Anti-Mildew & Anti-Fungal PVC Treatment
Available Widths	5m / 8m / 10m / 15m / 20m / 25m
UV Protection	UPF 50+
Wind Load	80-100 km/h
Fire Rating	DIN 4102 B1 / M2
Assembly Time	4-6 Workers, 2-4 Hours for a 10m x 20m Tent
Frame Lifespan	10-15 Years with Normal Maintenance

Applications

Rainy-season weddings and traditional ceremonies

Church rainy-season conventions and harvest programs

Corporate events and product launches scheduled year-round

Outdoor graduation and matriculation ceremonies

Open-air church services that continue through wet weather

Trade fairs, exhibitions and market promotions

VIP hospitality areas at sporting and cultural events

Emergency and temporary shelter for community programs

Why Buy Direct From Our Factory

10+ Years of Specialized Experience: Our factory has designed and manufactured aluminum alloy marquee tents since 2013, delivering 5,000+ structures to clients across Africa, the Middle East, Europe and Southeast Asia.

Certified Production & Quality Control: ISO 9001:2015 certified workshop. Every frame batch is weld-tested and every PVC cover is water-tested before packing, so what arrives in Nigeria is ready to erect.

Aluminum Alloy Engineering Expertise: We build with 6061-T6 and 6082-T6 aluminum profiles - the same alloy family trusted in aerospace structures - anodized or powder-coated to resist corrosion in tropical climates.

Proven Nigeria Export Record: Regular sea freight shipments to Apapa and Tin Can Island ports, Lagos, with complete export documentation, fumigation certificates and seaworthy packing.

In-House Design & Structural Calculation: Every configuration is checked with CAD structural analysis - wind load, span, anchoring - before production begins. No guessing, no cutting corners.

Responsive After-Sales Support: Spare parts supply, assembly drawings, video guidance and 24-hour replies to technical questions from our export team.

Frequently Asked Questions

Q: Will water really not leak through the roof? A: The 900g PVC cover is 100% waterproof, and because all seams are heat-sealed and taped (not sewn), there are no needle holes for water to find. We water-test every cover before packing.

Q: Can the tent stay up during the whole rainy season? A: Yes. The frame is rated for long-term installation and the cover is UV-stabilized and anti-mildew treated, so it can remain erected for months with regular inspection.

Q: Does the gutter system come standard? A: It is included in the standard package for widths of 10m and above, and available as an option for smaller sizes.

Q: How do I clean the cover after muddy events? A: Just hose it down with water and mild soap. The smooth PVC surface releases dirt easily and dries quickly.

Q: What anchoring is recommended for storm season? A: We supply ground stakes, ballast weight options and rope kits. For permanent installations, concrete base plates are recommended - our engineers will advise based on your site.

Q: Do you ship spare covers separately? A: Yes - many Nigerian clients buy a spare cover set for rotation, and we offer replacement covers for any tent size we manufacture.

Simple 4-Step Ordering Process

- 1 **Inquiry:** Send us your required size, quantity and event type via Email or WhatsApp.
- 2 **Proposal:** Within 24 hours you receive a CAD layout, structural specification, quotation and freight estimate.
- 3 **Production:** 7-15 days for standard sizes, 15-30 days for custom printing or special configurations, with production photos before shipment.
- 4 **Delivery:** Seaworthy packing, full shipping documents, and remote assembly guidance until your tent is standing.
