

Quick Install Aluminum Party Marquee Tent Nigeria Portable Event Canopy Hire Service

Our Product Introduction

Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: Marquees Tent
- Certification: ISO 9001:2015, CE, SGS
- Model Number: AMT-NG-500
- Minimum Order Quantity: 1 Set
- Price: USD 620-3,500 / Set
- Packaging Details: Wheeled storage bags for covers, palletized frames, seaworthy export packing
- Delivery Time: 7-15 days for standard sizes, 15-30 days for custom orders
- Payment Terms: T/T, L/C, Western Union, PayPal
- Supply Ability: 500 Sets per Month

Quick Install Aluminum Party Marquee Tent Nigeria
Portable Event Canopy Hire Service

Product Specification

- Assembly Time: 2 Workers, 30-60 Minutes (10m X 20m)
- Connection System: Tool-Free Quick-Release Pins & Snap Connectors
- Tools Required: None - No Wrenches, No Ladders For Frame Assembly
- Frame Material: Aluminum Alloy 6061-T6, Lightweight Profile
- Cover Material: 850g Double-Sided PVC Tarpaulin
- Packing Format: Wheeled Storage Bags + Palletized Frame Kits
- Transport Fit: Fits Standard 20ft / 40ft Container Or Pickup Truck
- Hire Cycle Durability: Designed For 100+ Setup/Teardown Cycles
- Available Widths: 3m / 5m / 8m / 10m / 15m / 20m
- Maintenance: Low - Wipe Clean Cover, Annual Bolt Check
- Waterproof Rating: 100% Waterproof
- Fire Rating: DIN 4102 B1 / M2

Product Description

Quick Install Aluminum Party Marquee Tent - Built for Nigeria's Tent Hire Business

For Nigerian tent rental companies, time is money. A crew that can erect and strike a marquee in under an hour can serve two events in a weekend, while slower competitors lose bookings. Our **quick install aluminum party marquee tent** is designed around one goal: the fastest safe setup in the industry.

The secret is a **tool-free connection system** - color-coded, numbered frames that click together with quick-release pins. No wrenches, no loose bolts, no ladders for the main frame. Two trained workers can raise a 10m x 20m marquee in 30-60 minutes, and strike it even faster.

This is also the most hire-friendly tent we make: covers roll into wheeled storage bags, frames pack onto pallets that fit standard containers or pickup trucks, and every component is hardened for 100+ setup cycles. Built to be moved, booked and moved again.

Key Features

Tool-Free Assembly: Quick-release pins and snap connectors mean zero tools and zero lost bolts - the frame clicks together in logical numbered order.

2-Person Setup: A 10m x 20m tent goes up with just two workers in 30-60 minutes, cutting your labor cost per event dramatically.

Color-Coded Parts: Frames are numbered and color-marked so even new crews assemble correctly on the first try.

Compact Packing: Covers store in wheeled bags; frames pack flat on pallets. One pickup truck can carry a full 10m x 20m event package.

Built for Repeated Hire: Reinforced connection points and abrasion-resistant covers survive 100+ erection cycles - the real test of a rental tent.

Fast Strike & Move: Teardown is even quicker than setup, enabling same-weekend double bookings and easy relocation between venues.

Low Maintenance: No rust, no lubrication points, no complicated mechanisms. Wipe the cover, check the pins, book the next event.

Complete Hire Package: Pair with our side walls, linings, flooring and staging accessories to offer full-service packages that command higher rates.

The Business Case for Nigerian Tent Hire Companies

ROI insight: In Lagos, a 10m x 20m marquee rents for approximately USD 300-600 per event. At two bookings per weekend, a tent costing under USD 3,500 can pay for itself within 3-6 months - if it is quick to install and reliable. That is exactly what this tent is built for.

More Bookings Per Weekend: Fast setup and strike let you run Friday-evening, Saturday-afternoon and Sunday events with the same crew and equipment.

Lower Labor Costs: Two workers instead of six per tent means your margin improves on every single job.

Expand Your Fleet Faster: The lower price point and compact storage let hire companies grow their fleet of tents without expanding warehouses or hiring more crew.

Perfect for Upcountry & Inter-State Jobs: Compact packing means you can transport tents to Ibadan, Abeokuta, Benin City or Enugu economically - and set up fast on arrival.

Damage-Resistant Design: Rental equipment takes abuse. Our reinforced joints and heavy-duty covers are built for careless handlers and rough transport.

Factory-Direct Pricing: Buy directly from the manufacturer, not through middlemen, keeping your purchase price - and your payback period - as low as possible.

Technical Specifications

Specification	Detail
Assembly Time	2 Workers, 30-60 Minutes (10m x 20m)
Connection System	Tool-Free Quick-Release Pins & Snap Connectors
Tools Required	None - No Wrenches, No Ladders for Frame Assembly
Frame Material	Aluminum Alloy 6061-T6, Lightweight Profile
Cover Material	850g Double-Sided PVC Tarpaulin
Packing Format	Wheeled Storage Bags + Palletized Frame Kits
Transport Fit	Fits Standard 20ft / 40ft Container or Pickup Truck
Hire Cycle Durability	Designed for 100+ Setup/Teardown Cycles
Available Widths	3m / 5m / 8m / 10m / 15m / 20m
Maintenance	Low - Wipe Clean Cover, Annual Bolt Check
Waterproof Rating	100% Waterproof
Fire Rating	DIN 4102 B1 / M2

Applications

- Tent hire / rental fleets for weddings and parties
- Portable event canopies for pop-up venues and lounges
- Church events and open-air services
- School events, sports days and community functions
- Exhibitions and market promotions
- Corporate picnics and staff events
- Emergency shelter deployment
- Multi-city roadshows and touring events

Why Buy Direct From Our Factory

10+ Years of Specialized Experience: Our factory has designed and manufactured aluminum alloy marquee tents since 2013, delivering 5,000+ structures to clients across Africa, the Middle East, Europe and Southeast Asia.

Certified Production & Quality Control: ISO 9001:2015 certified workshop. Every frame batch is weld-tested and every PVC cover is water-tested before packing, so what arrives in Nigeria is ready to erect.

Aluminum Alloy Engineering Expertise: We build with 6061-T6 and 6082-T6 aluminum profiles - the same alloy family trusted in aerospace structures - anodized or powder-coated to resist corrosion in tropical climates.

Proven Nigeria Export Record: Regular sea freight shipments to Apapa and Tin Can Island ports, Lagos, with complete export documentation, fumigation certificates and seaworthy packing.

In-House Design & Structural Calculation: Every configuration is checked with CAD structural analysis - wind load, span, anchoring - before production begins. No guessing, no cutting corners.

Responsive After-Sales Support: Spare parts supply, assembly drawings, video guidance and 24-hour replies to technical questions from our export team.

Frequently Asked Questions

Q: How fast can my crew really set it up? A: Two trained workers: 30-60 minutes for a 10m x 20m. First-time crews typically take double that on the first build, then improve rapidly with the numbered system.

Q: Is quick assembly safe in wind? A: Yes - the pin system locks every joint rigidly, and once anchored the structure holds the same wind rating as our standard frames. Never skip the anchoring step.

Q: How does this compare to renting a tent from competitors? A: This is a purchase for your own fleet. At typical Nigerian hire rates, most clients recover the purchase cost within 3-6 months of weekend bookings.

Q: What transport do I need? A: A 10m x 20m package fits in a standard pickup truck with the frame on a small trailer or in a van. Larger sizes ship on pallets for container freight.

Q: What if a part is damaged during hire? A: Spare frames, pins and covers are available from our factory at cost. Keep a small spares kit and you will never cancel an event over a broken part.

Q: Do you offer training? A: Every order includes an assembly video and manual. For fleet orders (5+ tents) we offer a live video training session with your crew before shipment.

Simple 4-Step Ordering Process

- 1 Inquiry:** Send us your required size, quantity and event type via Email or WhatsApp.
- 2 Proposal:** Within 24 hours you receive a CAD layout, structural specification, quotation and freight estimate.
- 3 Production:** 7-15 days for standard sizes, 15-30 days for custom printing or special configurations, with production photos before shipment.
- 4 Delivery:** Seaworthy packing, full shipping documents, and remote assembly guidance until your tent is standing.

Contact Us - Get a Quotation for Your Nigeria Project

Ready to order or need a detailed quotation? Our export team replies within 24 hours with pricing, assembly plans and freight cost to your nearest Nigerian port (Lagos, Port Harcourt, Onne or Tincan).
