

Aluminum Alloy Party Marquee Tent South Africa Wedding Outdoor Event Venue

Our Product Introduction

Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: Marquees Tent
- Certification: ISO 9001:2015, CE, SGS
- Model Number: AMT-ZA-100
- Minimum Order Quantity: 1 Set
- Price: USD 680-3,800 / Set
- Packaging Details: Waterproof woven bag + wooden pallet, seaworthy export packing for sea freight to Durban or Cape Town, South Africa
- Delivery Time: 7-15 days for standard sizes, 15-30 days for custom orders
- Payment Terms: T/T, L/C, Western Union, PayPal
- Supply Ability: 500 Sets per Month

Product Specification

- Frame Material: Aluminum Alloy 6061-T6, Anodized Finish
- Cover Material: 850g Double-Sided PVC Tarpaulin, Flame Retardant
- Roof Type: Peak Roof With Optional White Lining Ceiling
- Available Widths: 3m / 5m / 8m / 10m / 15m / 20m / 25m / 30m
- Available Lengths: Custom, In 3m Or 5m Bay Modules
- Wall Options: Solid PVC Walls, Clear PVC Windows, Half Walls, French Doors
- Waterproof Rating: 100% Waterproof, Heat-Sealed Seams
- Wind Load: 80-100 Km/h With Standard Anchoring
- UV Protection: UPF 50+ Coated Cover
- Assembly Time: 4-6 Workers, 2-4 Hours For A 10m X 20m Tent
- Frame Lifespan: 10-15 Years With Normal Maintenance
- Fire Rating: DIN 4102 B1 / M2 Flame Retardant
- Highlight: aluminum alloy party marquee tent,

Product Description

Aluminum Alloy Party Marquee Tent - Premium Event Venue for South African Weddings

From Cape Town winelands estates to Johannesburg garden venues, from Durban beachfronts to Pretoria country clubs, the **aluminum alloy party marquee tent** is how South African event professionals create elegant, weather-proof venues anywhere. Our free-span aluminum frame removes every center pole, opening up one uninterrupted space for your reception tables, dance floor, stage and bar - styled exactly the way you imagine.

South African couples and event planners choose our marquees for three reasons: **beauty, strength and speed**. The clean white 850g PVC roof and optional lining ceiling photograph beautifully; the 6061-T6 aluminum alloy frame stands firm through summer thunderstorms and Cape winds; and the numbered, tool-free assembly system turns an empty lawn into a wedding venue in a single morning.

Every tent is manufactured to order - your size, your colors, your wall configuration - then shipped to South Africa with full assembly support. No generic tents, no compromises.

Key Features

Free-Span Aluminum Frame: Zero center poles means unobstructed views, flexible table layouts and maximum usable floor space for catering and staging.

Elegant White Venue Look: The bright white PVC roof and optional lining ceiling create a clean, premium canvas for décor, florals and lighting.

Weather-Ready: 100% waterproof heat-sealed roof, UPF 50+ sun protection and engineered wind resistance - one venue solution for all four seasons.

Fast Professional Setup: Numbered frames and quick-release pins let a 4-6 person crew erect a 10m x 20m venue in 2-4 hours.

Complete Décor Compatibility: Chandelier hooks, lining ceilings, draping rails, flooring, staging and air-conditioning points all integrate with the frame system.

Modular & Expandable: Add bays to lengthen the tent or connect multiple tents into L-shape, T-shape and courtyard layouts for large guest counts.

Rust-Free Anodized Finish: Aluminum never rusts, so your tent stays pristine through coastal humidity and highveld rain.

10-15 Year Frame Life: A marquee is an asset, not an expense - this frame serves hundreds of events over a decade or more.

Why South African Event Professionals Choose Us

Market insight: South Africa's wedding and event season peaks from November to February (summer), with a strong year-round corporate market in Johannesburg, Cape Town and Durban. A versatile aluminum marquee can be booked 30-50 weekends per year.

Winelands & Garden Venues: Our free-span design suits Stellenbosch, Franschhoek and Paarl wine estates where permanent halls cannot be built - the tent becomes the venue.

Summer Storm Ready: Highveld thunderstorms and coastal squalls arrive fast in summer. Our anchored frames and steep roofs shed wind and rain safely.

Load-Shedding Proof: Tents need no power to stand. Events continue through load shedding with generators for lighting - a marquee never cancels a booking.

Coastal & Highveld Tough: Anodized aluminum resists both Cape Town's salt air and the highveld's dry cold - no rust, no corrosion, no ugly stains.

Easy Import to South Africa: We ship regularly to Durban and Cape Town ports with full documentation, making SARS clearance straightforward for first-time importers.

Proven Local Supply: We supply event companies, wedding planners and hire fleets across Gauteng, Western Cape and KwaZulu-Natal.

Technical Specifications

Specification	Detail
Frame Material	Aluminum Alloy 6061-T6, Anodized Finish
Cover Material	850g Double-Sided PVC Tarpaulin, Flame Retardant
Roof Type	Peak Roof with Optional White Lining Ceiling
Available Widths	3m / 5m / 8m / 10m / 15m / 20m / 25m / 30m
Available Lengths	Custom, in 3m or 5m Bay Modules
Wall Options	Solid PVC Walls, Clear PVC Windows, Half Walls, French Doors
Waterproof Rating	100% Waterproof, Heat-Sealed Seams

UV Protection	UPF 50+ Coated Cover
Assembly Time	4-6 Workers, 2-4 Hours for a 10m x 20m Tent
Frame Lifespan	10-15 Years with Normal Maintenance
Fire Rating	DIN 4102 B1 / M2 Flame Retardant

Applications

- Wedding receptions and ceremonies (winelands, garden, beachfront)
- Corporate functions, year-end functions and gala dinners
- Birthday parties, milestone celebrations and anniversaries
- School balls, matric dances and university events
- Christenings, barmitzvahs and family gatherings
- Exhibitions, product launches and brand activations
- Safari lodge and resort event pavilions
- Sports hospitality and tournament villages

Why Buy Direct From Our Factory

- 10+ Years of Specialized Experience:** Our factory has designed and manufactured aluminum alloy marquee tents since 2013, delivering 5,000+ structures to clients across Africa, the Middle East, Europe and Southeast Asia.
- Certified Production & Quality Control:** ISO 9001:2015 certified workshop. Every frame batch is weld-tested and every PVC cover is water-tested before packing, so what arrives in South Africa is ready to erect.
- Aluminum Alloy Engineering Expertise:** We build with 6061-T6 and 6082-T6 aluminum profiles - the same alloy family trusted in aerospace structures - anodized or powder-coated to resist corrosion in coastal and highveld climates.
- Proven South Africa Export Record:** Regular sea freight shipments to Durban and Cape Town ports with complete export documentation, fumigation certificates and seaworthy packing that clears SARS customs smoothly.
- In-House Design & Structural Calculation:** Every configuration is checked with CAD structural analysis - wind load, span, anchoring - before production begins. No guessing, no cutting corners.
- Responsive After-Sales Support:** Spare parts supply, assembly drawings, video guidance and 24-hour replies to technical questions from our export team.

Frequently Asked Questions

- Q: What sizes are available?** A: Standard widths from 3m to 30m, with any length in 3m or 5m modules. Non-standard sizes are engineered on request for your specific venue.

Q: How long does shipping to South Africa take? A: Sea freight from Guangzhou to Durban typically takes 25-35 days. We prepare all export documents including the packing list and fumigation certificate for SARS clearance.

Q: Can the tent handle summer thunderstorms? A: Yes. The frame is anchored with stakes or ballast per our engineering recommendation, and the steep roof pitch prevents water pooling and sheds wind gusts.

Q: Can we hang chandeliers and décor from the frame? A: Yes - the frame includes designated hanging points, and we can add internal trusses for heavy lighting and draping installations.

Q: Do you offer lining ceilings? A: Yes, white lining ceilings are a popular option for weddings - they hide the frame structure and give a clean, premium interior finish.

Q: What is your warranty? A: 12 months against manufacturing defects on frame and cover, plus lifetime technical support and spare parts supply.

Simple 4-Step Ordering Process

- 1 Inquiry:** Send us your required size, quantity and event type via Email or WhatsApp.
- 2 Proposal:** Within 24 hours you receive a CAD layout, structural specification, quotation and freight estimate.
- 3 Production:** 7-15 days for standard sizes, 15-30 days for custom printing or special configurations, with production photos before shipment.
- 4 Delivery:** Seaworthy packing, full shipping documents, and remote assembly guidance until your tent is standing.
