- Accessories: Stairs, Railing, Flooring, Lighting, VIP Lining
- Highlight: **Double Decker party marquee tent,
Two storey aluminum event tent,
Tanzania venue party marquee**

Product Description

Double your event space without doubling your footprint.

Where land is limited and guest lists are long, a double decker two storey aluminum party marquee tent solves the problem in one structure. A reinforced aluminium alloy frame carries a composite cassette floor, an internal staircase and safety railings, so you gain a ground floor and an upper deck for VIP seating, hospitality or viewing in Tanzania's busy urban venues.

Over a Decade of Marquee Engineering Experience

Multi-level structures demand real engineering, and we have spent more than ten years designing and stress-checking two-storey marquees with certified floor loads and safe stairways. That experience lets us deliver a double decker tent that is genuinely usable, not just tall.

Key Features and Advantages

Two full levels within a single footprint

Reinforced frame with certified composite cassette floor

Internal staircase with handrails and safety balustrade

Upper floor rated for seating, staging and hospitality

Modular bays for flexible ground-floor and upper-deck layouts

Engineered and load-tested for wind and floor loads

Technical Specifications

Structure	Two storey / double decker aluminium frame
Floor System	Steel-aluminium composite cassette floor
Upper Floor Load	Up to 500 kg/m ² , staircase and railing included
Frame Material	6061-T6 / 6063-T5 Aluminium Alloy, hard-anodised
Wind Load	Up to 100 km/h with certified base plates
Flame Retardancy	B1 / M2 (DIN 4102) certified fabric and panels
Service Life	15-20 years with basic maintenance
Connectors	Hot-dip galvanised steel, salt-air resistant

Why This Tent Fits the Tanzania Market

Ideal where land is scarce in Dar es Salaam and other fast-growing cities.

Doubles usable space for events without extra ground rent.

Composite floor and aluminium frame handle humid coastal conditions.

A striking format for trade fairs and premium hospitality in Tanzania.
Component labelling keeps complex multi-level assembly straightforward.

Applications

Trade fairs and exhibitions
VIP lounges and hospitality decks
Sports and event viewing stands
Showrooms and demonstration spaces
Corporate receptions and galas
Brand activations and pop-ups

Customisation and OEM Service

We size both levels, the staircase and the floor loading to your event type, and can add railings, VIP linings, glass balustrades and integrated lighting. OEM production with your branding on components and documentation is available for rental operators and venues.

Quality, Certifications and Assurance

Every two storey frame is welded on calibrated jigs and the floor system is load-tested before dispatch. We provide ISO 9001:2015 documentation with CE, SGS and structural load certificates to support your safety and insurance requirements.

Packaging, Shipping and Delivery to Tanzania

Structural beams and floor cassettes ship banded on steel pallets, and components are labelled by bay for fast, accurate assembly on site. We manage export documentation and advise on container plans for deliveries to Tanzania.

Frequently Asked Questions

+ Is a double decker tent structurally safe?

+ How is the upper floor accessed?

+ Can the two levels be used separately?
