- Temperature Range: -30 C To +70 C
- Optional Accessories: Flooring, Lining, Glass Door, Air Conditioner
- Highlight: **Aluminum alloy party marquee tent,
Clear span frame event tent,
Ghana event hire marquee tent**

Product Description

A freestanding, column-free structure engineered for Ghana's event and rental market.

Our clear span aluminum alloy party marquee tent gives you a fully self-supporting interior with no centre poles, so every square metre stays usable for guests, staging or exhibition booths. The frame is built from high-grade 6061-T6 aluminium alloy and paired with a double PVC-coated polyester roof, making it a dependable choice for event hire companies and venues across Ghana.

Over a Decade of Marquee Engineering Experience

For more than ten years our factory has designed, welded and finished aluminium marquee systems for rental fleets, wedding venues and temporary structures worldwide. That decade of hands-on production experience shows in the details: a jig-built frame that assembles square, connectors that survive coastal salt air, and drawings that match the structure you actually receive.

Key Features and Advantages

Fully self-supporting clear span frame with zero interior columns

High-grade 6061-T6 aluminium alloy, hard-anodised for humid coastlines

Modular bays expand in 3 m or 5 m increments for any footprint

650-850 gsm double PVC-coated roof, waterproof and UV stabilised

100 km/h wind load rating with certified base plates and anchors

Fast dry-hire assembly using coded, numbered components

Technical Specifications

Structure	Clear span, modular, no interior poles
Standard Bay	3 m or 5 m bay width, expandable length
Sidewall Options	PVC, tempered glass, ABS panel or sandwich panel
Frame Material	6061-T6 / 6063-T5 Aluminium Alloy, hard-anodised
Roof Cover	650-850 gsm double PVC-coated polyester, UV stabilised
Wind Load	Up to 100 km/h with certified base plates
Flame Retardancy	B1 / M2 (DIN 4102) certified fabric
Service Life	15-20 years with basic maintenance
Connectors	Hot-dip galvanised steel, salt-air resistant

Why This Tent Fits the Ghana Market

Engineered for the tropical heat and coastal humidity of Accra and Takoradi.

Hot-dip galvanised connectors resist salt-air corrosion along the Gulf of Guinea.

Sea-freight optimised packing straight to Tema Port lowers your landed cost.

Spare parts and assembly guidance in English for local rental teams.

Proven for weddings, funerals and corporate events across Ghana.

Applications

Weddings and receptions

Corporate galas and award nights

Funerals and memorial gatherings

Trade exhibitions and product launches

Church and community events

Festivals and outdoor markets

Customisation and OEM Service

Tell us the guest count, venue and climate conditions and we will size the clear span accordingly. We offer custom colours, printed sidewalls, glass or ABS walls, transparent roofs, interior linings, flooring and air-conditioning openings. As original equipment for rental brands we can print your logo on the framework and packaging, then ship under your own label.

Quality, Certifications and Assurance

Every frame is welded on calibrated jigs and the fabric is tested for tear strength, colour fastness and waterproofness before packing. We work to ISO 9001:2015 and supply CE, SGS and B1 flame-retardant reports with each order, so your installation meets local safety and insurance requirements.

Packaging, Shipping and Delivery to Ghana

Frames ship knocked-down on steel pallets, which keeps container loading efficient and protects components in transit. We prepare commercial invoices, packing lists and certificates of origin, and advise on container size so your goods clear Tema Port smoothly.

Frequently Asked Questions

+ What is the widest clear span you can build?

+ Do you ship to Ghana?

+ How much maintenance is needed?

Talk to a Marquee Specialist Today

Tell us your venue, guest numbers and climate needs. We reply within 24 hours with a drawing, a clear quotation and shipping advice to Ghana.
