

UV Resistant Aluminum Party Marquee Tent Coastal Proof for Kenya Hot Climate

Our Product Introduction

Basic Information

- Place of Origin: Guangzhou, Guangdong, China
- Brand Name: Marquees-Tent
- Certification: ISO 9001:2015; CE; SGS Tested; B1 Flame Retardant
- Model Number: MT-UV-COAST-K4
- Minimum Order Quantity: 1 Set
- Price: USD 28-65 / Square Meter
- Packaging Details: Heat-reflective cover wrapped in UV-protective bags, frame on pallets, export cartons for sea shipment to Mombasa Port
- Delivery Time: 7-12 days for stock, 15-30 days for production
- Payment Terms: T/T, L/C, Western Union, Trade Assurance
- Supply Ability: 2000 Square Meters per Month

Product Specification

- Frame Material: 6061-T6 / 6063-T5 Aluminium Alloy
- Roof Fabric: 650-850gsm UV Treated PVC Coated Polyester
- UV Rating: UPF 50+, UV Stabilised
- Roof Colour: White Or Heat Reflective Silver
- Salt Resistance: Corrosion Resistant Frame And Hardware
- Ventilation: Ridge Vents And Mesh Windows Optional
- Wind Load: Up To 100 Km/h
- Flame Retardancy: B1 / M2 DIN 4102
- Sidewall: PVC, Mesh Or Solid Wall
- Temperature Range: -30 C To +70 C
- Highlight: **UV resistant aluminum party tent, coastal proof marquee tent, Kenya hot climate party marquee**

Product Description

Keeps guests cool and stays corrosion-free along Kenya's hot coast.

Under equatorial sunlight a tent can become a greenhouse within minutes, and near the coast salt air attacks unprotected metal. This UV resistant aluminum party marquee tent answers both with a UPF 50+ UV-stabilised cover, a heat-reflective roof colour and a corrosion-resistant frame, plus optional ridge vents and mesh windows to keep daytime events in Kenya comfortable.

Over a Decade of Marquee Engineering Experience

A decade of supplying tents to hot, high-sun and coastal markets shaped this design. We have learned how fabric behaves after years of intense UV, how colour fades, and how hardware corrodes near the sea, so every material choice here is made for long-term performance rather than a single season.

Key Features and Advantages

UPF 50+ UV-stabilised cover resists fading and cracking

Heat-reflective white or silver roof reduces interior temperature

Corrosion-resistant aluminium alloy and hardware for coastal salt air

Optional ridge vents and mesh windows improve airflow

Compatible with air conditioning and fan openings

Modular bays for flexible event layouts

Technical Specifications

UV Protection	UPF 50+, UV-stabilised fabric
Roof Colour	Heat-reflective white or silver
Salt Resistance	Corrosion-resistant frame and hardware
Frame Material	6061-T6 / 6063-T5 Aluminium Alloy, hard-anodised
Roof Cover	650-850 gsm double PVC-coated polyester, UV stabilised
Wind Load	Up to 100 km/h with certified base plates
Flame Retardancy	B1 / M2 (DIN 4102) certified fabric
Service Life	15-20 years with basic maintenance
Connectors	Hot-dip galvanised steel, salt-air resistant

Why This Tent Fits the Kenya Market

Made for Kenya's strong equatorial sun and hot Indian Ocean coast.

UV-stabilised cover resists fading and surface cracking over years of exposure.

Heat-reflective roof and vents lower daytime interior temperatures.

Corrosion-resistant hardware suits humid coastal venues near Mombasa and Diani.

Durable aluminium alloy frame keeps its strength in high heat.

Applications

Daytime outdoor weddings

Beach and resort events

Corporate and government events

Product launches and brand activations

Sports and community gatherings

Hospitality and dining pavilions

Customisation and OEM Service

We tailor the roof colour, vent layout and wall material to your climate and event style, and can add mesh windows, AC openings, floor insulation and branded sidewalls. OEM production with your own logo on covers and packaging is available for distributors and rental fleets.

Quality, Certifications and Assurance

Covers are tested for UV stability, tear strength and colour fastness, and frames are welded on calibrated jigs. We supply ISO 9001:2015 documentation plus CE, SGS and B1 flame-retardant reports so your installation meets local requirements.

Packaging, Shipping and Delivery to Kenya

UV-protected packing keeps covers in good condition during transit, and frames ship on steel pallets for efficient container loading. We handle export documents and advise on the best container plan for Kenya deliveries.

Frequently Asked Questions

+ How long does the UV resistance last?

+ Will it resist coastal salt air?

+ Can I add air conditioning?

Talk to a Marquee Specialist Today

Tell us your venue, guest numbers and climate needs. We reply within 24 hours with a drawing, a clear quotation and shipping advice to Kenya.
