- Flame Retardancy: B1 / M2 DIN 4102
- UV Resistance: UPF 50+, UV Stabilised
- Interior Lining: Pleated Roof And Wall Lining Optional
- Lighting: Truss And Lighting Points Ready
- Highlight: **curved roof aluminum party marquee, modular frame wedding tent, Mexico weddings marquee tent**

Product Description

A graceful arc silhouette that turns weddings and galas into landmark events.

When a plain gable tent is not enough, the curved roof aluminum party marquee tent delivers a soft, sweeping profile that photographs beautifully from every angle. The arc is formed from precision-bent aluminium alloy beams under a tensioned PVC cover, giving a premium look for weddings and galas while keeping the fast, modular assembly that rental teams rely on.

Over a Decade of Marquee Engineering Experience

We have supplied curved and arcum marquee systems for more than ten years, including wedding venues in warm, humid and coastal climates. Our designers understand how a curved roof sheds rain and how to keep the fabric taut in coastal breezes, so the tent looks elegant on day one and stays that way for years.

Key Features and Advantages

Precision-bent curved aluminium beams create an elegant arc roofline

Tensioned PVC cover stays smooth and wrinkle free

Modular frame for fast assembly and compact storage

Optional clear PVC or glass walls for an open, airy feel

Compatible with interior roof and wall linings and drapes

Engineered and tested for wind and rain resistance

Technical Specifications

Roof Style	Curved / arcum self-supporting beam
Standard Bay	3 m or 5 m bay width, expandable length
Wall Options	Clear PVC, tempered glass, solid wall or lining
Frame Material	6061-T6 / 6063-T5 Aluminium Alloy, hard-anodised
Roof Cover	650-850 gsm double PVC-coated polyester, UV stabilised
Wind Load	Up to 100 km/h with certified base plates
Flame Retardancy	B1 / M2 (DIN 4102) certified fabric
Service Life	15-20 years with basic maintenance
Connectors	Hot-dip galvanised steel, salt-air resistant

Why This Tent Fits the Mexico Market

A popular choice for destination weddings in Cancún, Los Cabos and Riviera Maya.

Curved roof sheds heavy rain during Mexico's rainy and hurricane season.

UV-stabilised fabric keeps colours rich under strong tropical sun.

Aluminium alloy frame resists corrosion in humid coastal venues.

Flat-packed shipping to Manzanillo or Veracruz keeps freight costs predictable.

Applications

Destination beach and resort weddings

Engagement and anniversary dinners

Corporate galas and award nights

Fashion shows and photo sets

VIP hospitality pavilions

Cocktail and garden parties

Customisation, Styling and OEM Service

Choose the exact span, curve, wall material and lining to match your theme. We can supply pleated ceiling linings, crystal or fabric drapes, matching entrance arches and printed wall graphics. For rental and venue brands we offer OEM production with your own branding on fabric bags and packaging.

Quality, Certifications and Assurance

The curved beams are formed on controlled mandrels so each arc matches the next, and the fabric is checked for strength and colour stability before dispatch. We provide ISO 9001:2015 documentation together with CE, SGS and B1 flame-retardant certificates for your safety filings.

Packaging, Shipping and Delivery to Mexico

Curved beams are padded, banded and palletised to protect the bend through transit, while covers are folded into woven bags. We handle export paperwork and can advise on the most economical container loading for deliveries to Mexico.

Frequently Asked Questions

+ Is the curved roof as strong as a flat gable tent?

+ Can I add glass walls and linings?

+ Do you deliver to Cancun and Los Cabos?

Talk to a Marquee Specialist Today
