

Atrium Tent Rustic Orangery Gable Party Marquee for Barn Wedding Reception

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Tendars
- Certification: ISO 9001:2015, CE, SGS
- Model Number: TDS-AT20P

Product Specification

- Roof Type: Orangery Gable
- Seating Capacity: Up To 400 Guests
- Roof Fabric Weight: 850g/sqm
- Frame Alloy: 6061/T6
- Interior Columns: None (clear Span)
- Lining: Timber-tone Option
- Fire Rating: DIN 4102 B1 / M2
- Wind Load: 100 Km/h
- Snow Load: 75 Kg/sqm
- Warranty: 5 Years Frame
- Structure Type: Clear-span Gable (A-frame), No Interior Columns
- Span Range: 3-60m; Length Extends In 3m / 5m Bays Without Limit
- Floor Utilisation: 100% Usable, Unobstructed Sightlines
- Surface Treatment: Anodized / Fluorocarbon Coated

Product Description

Atrium Tent Rustic Orangery Gable Party Marquee for Barn Wedding Reception

At a glance

Model	TDS-AT20P
Span width	20m
Eave / ridge height	4.5m / 9.05m
Seating	up to 400 guests
Frame	6061-T6 aluminium, hot-dip galvanised connectors
Roof / wall fabric	850 g/sqm roof / 650 g/sqm wall, double PVC
Wall options	Tempered glass / PVC soft / ABS hard / sandwich panel
Fire rating	DIN 4102 B1 / M2, NFPA 701
Wind / snow load	100-120 km/h / 0.3-0.5 kN/sqm
Assembly	Modular bolt-together, about 1,000 sqm in 4-8 hours
Production lead time	15-25 days

Rustic weddings need a tent that warms to the setting rather than fights it. This orangery gable party tent uses a softer, classic roof line and pairs it with optional timber-toned liners and festoon lighting - which is why it fits barn venues, farms and countryside estates so well. The span lets you run a long banquet table down the centre or scatter round tables, and the 6061 T6 frame means you can hang heavy foliage chandeliers over the table without worrying about the load.

What you actually get

- A soft orangery roof line suits barns, farms and countryside venues
- 6061 T6 aluminium frame carries hanging foliage and festoon lighting loads safely
- Timber-toned lining and draping options create a warm rustic interior
- A wide clear span seats a large party in one open room
- Mix solid, translucent and clear bays to frame the countryside view
- Stays cool in summer and is lining-ready for autumn events

Available Sizes & Customisation

Spans from 9m to 30m; length built in 5m bays. We match lining colour, draping and lighting to your rustic palette, and can tint the roof for a softer tone.

Technical specifications

Frame	Hard pressed extruded aluminium 6061/T6
Frame finish	Mill finish, powder coating on request
Roof cover	850g/sqm blockout PVC, waterproof
Sidewall	650g/sqm translucent PVC with clear panels
Span (as shown)	20m, other spans on request

Length	Custom, in 5m bays
Eave / ridge height	4.5m / 9.05m
Bay distance	5m
Connector	Hot-dip galvanised steel
Lining	Timber-tone and drape options available
Wind load	100-120 km/h
Snow load	0.3-0.5 kN/sqm
Fire rating	DIN 4102 B1 / M2
Certification	ISO 9001:2015, CE, SGS
Warranty	5 years on the aluminium frame
MOQ	1 set
Lead time	15-25 working days after deposit
Port	Guangzhou / Shenzhen

Best-fit scenarios

Rustic and barn-style wedding receptions

Farm and countryside party venues

Autumn and harvest celebrations with a warm interior

Birthday and anniversary gatherings that favour a cosy feel

We finish many rustic interiors in-house and match the lining and drape colour to the venue, so buyers avoid the clash between a bright white stock tent and a heritage farm building.

Packaging, Payment & Delivery

Packing: aluminium frame tied in bundles, PVC covers folded in carry bags, everything crated in export-grade plywood for scratch-free sea freight.

Payment: T/T, L/C, Western Union and Trade Assurance - normally 30% deposit, balance before shipment.

Delivery: stock ships in 3-5 days, made-to-order structures in 15-25 working days after deposit; FOB, CIF, DDP available.

Buyer questions, answered

Can you make the interior feel less like a tent?

Yes. Timber-toned liners on the walls and roof plus a draped ceiling change the character completely. Most rustic clients then add festoon lighting and long trestle tables.

Will it match a barn venue?

The orangery gable roof line was chosen precisely because it sits well beside older buildings. We can also tint the roof to reduce the bright white look if you want a softer tone.

Can I hang greenery from the ceiling?

Yes. The 6061 T6 frame is rated for suspended decorative loads, and we confirm the allowable load once you tell us the

installation weight.

What is the minimum order?

One set, for a single event or for rental stock.

Do you offer a full styling package?

Yes - lining, draping, roof tint and lighting can all be quoted together so the marquee arrives ready to dress.

What are your payment and delivery terms?

30% T/T deposit, balance before shipment; made-to-order in 15-25 working days plus freight, with a loading plan supplied.

What warranty and spare parts do you provide?

Five years on the frame, two years on covers, and spare covers and fittings on request.

Who we are

Tendars started as a family workshop and still treats lining and finish as craft work rather than a line item - it shows in the rustic interiors.

Structure & Space

Clear-span gable (A-frame) design - no interior column, so the whole floor stays open.

Span range 3-60m; length extends without limit in 3m and 5m bays.

100% usable space - banquet rounds, a runway or a stage can be arranged freely, with no sightline blocked.

Frame & Materials

6061-T6 hard pressed extruded aluminium, anodised or fluorocarbon finish; **hot-dip galvanised steel** connectors.

About **one third the weight of steel** - corrosion free, paint free, re-installable again and again.

Frame life of **15-20 years** under normal use, with spare parts kept available.

Roof & Wall Fabric

Roof **850 g/sqm** and sidewall **650 g/sqm** double PVC, heat sealed rather than stitched.

Flame retardant to **DIN 4102 B1 / M2** and **NFPA 701**; waterproof, UV resistant, rated **-30 to +70 deg C**.

The DIN 4102 B1 fire test report matters more than any brochure image - it is the hard requirement for large event fire approval.

Enclosure Upgrades

Standard on the glass model: tempered glass curtain walls with glass doors.

Alternatives: PVC soft wall, ABS hard wall, or insulated sandwich panel wall.

Benefit: far more premium than soft PVC, usable as a semi-permanent building, able to connect to an existing building, with better acoustics and insulation.

Wind, Snow & Fixing

Design wind load 100-120 km/h (Beaufort 10-12); **snow load 0.3-0.5 kN/sqm**.

Three fixing methods: grass ground anchors, concrete expansion bolts, or marble counterweight plates.

A lawn can be used **without breaking its surface**; the other two methods cover concrete and hard standing.

Integrated Fit-out

Flooring system, air conditioning, **lighting hanging points**, and ceiling or curtain drapes.

Rain gutters carry drainage away where tents are joined side by side.

Delivered as a **turnkey package** - the suspended light fittings and long tables seen in banquet photos are a typical ready-to-use set.

Delivery & Assembly

Modular socket-and-bolt assembly with **no welding on site**.

Roughly **1,000 sqm assembles in 4-8 hours**.

Production 15-25 days - friendly to tight event schedules, and equally suitable as a permanent building.

What serious buyers check before they order

Ranked by the weight each point carries in the decision:

Safety & compliance. A third-party fire test report (not a verbal flame-retardant claim), wind and snow load calculations, whether the glass is tempered or laminated and its thickness, whether design loads match the city basic wind pressure, and whether a temporary building needs permits. For large events, standards such as DIN 4102 B1 are non-negotiable.

Site suitability. Ground type (grass, concrete, marble or asphalt) decides the fixing and whether building is possible at all; also confirm site dimensions, slope, buried services and tree pits, and access width for cranes or forklifts. On grass, check wet-season bearing capacity and drainage.

How the price is quoted. Per square metre or per set; whether freight, installation, dismantling and foundation work are included; how much more glass costs than PVC; whether flooring, HVAC and lights are extra; the MOQ; and buy-versus-rent for short events.

Lead time against the event countdown. Days from deposit to dispatch, transit time, on-site build time and a bad-weather fallback - the real fear is a tent that is not up the day before the event.

How a banquet tent actually feels. Glass houses build up greenhouse heat, so cooling load must be doubled and shading or Low-E glass added; rain noise on the roof; ventilation and insects; whether the clear height suits hung chandeliers (4m eave height or more is best for banquets); and floor flatness and whether a wooden floor system is needed.

Appearance and branding. Transparent versus blackout roof, glass versus fabric walls, fabric colour, and whether logos can be printed to match the venue.

Warranty and long-term cost. Frame warranty period, the cost of replacing covers after 5-8 years, long-term spare-part supply, on-site technician support and storage after dismantling.

Supplier backing. ISO 9001 / CE / SGS certification, comparable banquet project references, factory visits and export experience.

More questions buyers ask

Is there a third-party fire test report?

Yes. The fabric is tested to DIN 4102 B1 / M2 and NFPA 701, and we supply the wind and snow load calculation sheets with each order - the documents large-event fire approval usually asks for.

Can it be installed on grass without damaging it?

Yes. We use grass ground anchors or counterweight plates so the lawn surface stays intact; on concrete we use expansion bolts. Send site photos and we plan the fixing method before quoting.

How much more does a glass wall cost than PVC?

Glass is a real upgrade over PVC soft wall, so the difference is meaningful. Give us your sizes and we quote both versions side by side so you can compare directly.

How fast can it be ready for an event?

Stock ships in 3-5 days; made-to-order production runs 15-25 days plus transit. On site, about 1,000 sqm assembles in 4-8 hours, so a tight event calendar is workable.

Can you handle installation on site?

We provide full drawings and an assembly video, and can send a technician for larger projects. For repeat venues we train your own crew.

Does it work as a semi-permanent building?

Yes. With insulated sandwich walls, HVAC and a floor system it can run year-round and be connected to an existing building - many clients use it as a seasonal or permanent hall.

Why buyers choose Tendars

Guangzhou Tendars Tent Co., Limited is a direct manufacturer of aluminium clear-span structures, not a trading company - 10+ years in the industry.

Our own factory runs **CNC cutting** and jig welding, and every frame is trial-assembled before it is packed.

Certified to **ISO 9001:2015, CE, SGS and TUV**; tent structures shipped to 40+ countries.

Each order ships with **GA drawings, a container loading plan and an installation guide**

5-year frame warranty with spare covers and fittings kept in stock after the sale.

How we work with you

Tell us the event - date, city, guest count and a few site photos.

We design and quote - layout sketch, spec sheet and a line-by-line price, usually within 2 working days.

Confirm and produce - 30% deposit, drawings signed off, production in 15-25 days.

Ship and support - loading plan, assembly video, and an on-site technician if you need one.

Send us photos of your venue and the palette you have in mind, and we will quote the marquee with the lining, draping and lighting package that ties it together.

A personal note from our export team

Hello, this is Amanda at Guangzhou Tendars Tent Co., Limited. Every atrium tent we send out is checked by hand before it is crated, and I keep a note of your model and venue so follow-up orders match. If you have any question about your site, message me directly - I answer personally, usually within 12 hours.

Kind regards,

Amanda
