

High Peak Garden Gala Party Tent Pitched Roof Canopy Aluminum Frame Structure System

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Tendars
- Certification: ISO9001, SGS, COC, CE
- Model Number: TDP-HP10X20
- Minimum Order Quantity: 60 square meters
- Price: USD 46-60 / Square Meter
- Packaging Details: Frame bundles per bay pair, roof in numbered bags, gable inserts crated, hardware in wooden cases
- Delivery Time: 25 days production after deposit and drawing approval. Sea freight time depends on your destination port. Installation time varies with the project and site access.
- Payment Terms: T/T 30% deposit, balance before shipment; L/C at sight above USD 30,000
- Supply Ability: 40000 Square Meters per Month

Product Specification

- Span Width: 10m
- Length: 20m (2 Bays Of 10m)
- Eave Height: 2.5m
- Ridge Height: 6.0m
- Roof Pitch: About 35 Degrees
- Floor Area: 200 Square Meters
- Area Per Guest: 2 Sqm Per Guest, 100 Guests
- Main Frame: 122 X 68 X 3mm Aluminium 6061/T6
- Base Plate: 350 X 350mm Hot Dip Galvanised Steel
- Roof Fabric: 850gsm PVC, DIN 4102 B1
- Snow Load: 0.45 KN/sqm
- Frame Life Span: 20+ Years
- Production Time: 25 Days
- Highlight: **Aluminum Frame Party Tent**, **Pitched Roof Canopy Structure**,

Product Description

10m x 20m high peak party tent, 200 sqm

200 sqm under a 6m ridge. The tallest party tent we build, and the one that stops looking temporary in photographs.

Details

At 6m the ridge is above the height of a two storey house. That is not decoration: it means a lighting truss, a flower arch or a band backdrop can hang without crowding anyone, and the space above the tables stays visually open.

Area guide: at 10m span we quote 2 sqm per guest. 200 sqm seats 100 with a dance floor and a bar.

The steeper roof also sheds snow to 0.45 kN/sqm, so it is the model we ship to northern clients for winter galas.

Size range and options

Span: 10m. Range 3m to 10m, high peak from 6m.

Length: 10m bays, so 10, 20, 30m.

Eave: 2.5m, or 3m with a stage.

Gable: fabric infill, or framed glazed gable at 6+6mm laminated glass.

Extras: roof lining, chandelier points, ground bar, cassette floor, HVAC, entrance porch pagoda.

Main components

Frame. 122 x 68 x 3mm aluminium 6061/T6 with steeper rafters, galvanised connectors and 350 x 350mm base plates. 20+ years.

Covers. 850gsm roof and 650gsm walls to DIN 4102 B1. The gable triangles are cut and welded to the pitch, not gathered like a cheap tent - that is what keeps the ridge line straight.

Chandelier and truss points. Two purlin nodes per bay are rated for 60kg on request, enough for a decorative chandelier or a small lighting bar.

Specification

Item	Specification
Clear span / length	10m / 20m in 10m bays
Eave / ridge	2.5m / 6.0m, pitch about 35 degrees
Frame	122 x 68 x 3mm aluminium 6061/T6
Roof / walls	850gsm / 650gsm PVC, DIN 4102 B1
Snow load	0.45 kN/sqm
Packed weight	About 545kg, 3.2 cubic metres
Frame life	20+ years

Wind at the ridge

A 6m ridge catches more wind than a 4.2m one, and the gable is the vulnerable face. We ship two extra guy points per gable as standard on this model. On an exposed site, or between buildings, add a third set and double the anchor count on the windward corners.

Gutters are standard here: at 35 degrees the water arrives at the eave fast, and a 20m run without a gutter will dig a trench along the wall line.

Production and installation

25 days production after deposit, plus freight to your port. Six to seven people, one working day, longer if the gable is glazed. *Installation is quoted separately: labour, air tickets, visa, food and accommodation are paid by the buyer. Send us the site address and we confirm crew size, days and cost.*

FAQ

Is the glazed gable worth it? For a wedding or gala entrance, yes. It is the wall every guest photographs and it costs far less than a glass wall tent.

Can we hang a flower arch? Up to 60kg from a rated purlin node. Tell us the weight and position before we cut the fabric.

Does the height make it cold? Yes, slightly. Budget 20 percent more heating than the A-frame version of the same footprint.
